

## OLD FORMAT

### Volume 1 July 1958 – June 1959

#### Volume 1, Number 1, July 1958

Address of welcome: Professor D.P. Mellor, 5.  
Gem inclusions through a x10 loupe (ruby, emerald, sapphire): A.A. Wirth, 10-12.

Do we know enough about diamonds: W.A. Catanach, 25.

Gemmology and the salesman: S. Morrow, 28-29.

#### Volume 1, Number 2, August 1958

Fabulite – The new diamond substitute: Prof. Dr. Schlossmacher (trans. by J.D. Altmann), 8-9.

Gem mining in Ceylon: adapted from K.J. Semanader, 11-13.

Andamooka field excursion: R. Harvey, 16-17.

#### Volume 1, Number 3, September 1958

Australia's first pearl culture venture, 15-19.

European diamond market report: C.J. Ginder, 30-31.

#### Volume 1, Number 4, October 1958

Cultured emeralds and how they grow: C.F. Chatham, 7-11.

Inside the Chatham cultured emerald: T. Koller, 14-20.

#### Volume 1, Number 5, November 1958

Prasiolite: A.A. Wirth, 6-8.

A new method for producing synthetic ruby: Professor D.P. Mellor, 10-11.

Jewellery exhibition, Sydney, NSW, 12-15.

Marco Polo – Gem lover – Part 1, 22-23.

#### Volume 1, Number 6, December 1958

The origin of gems – Part 1: R. Grasso, 8-10.

Synthetic diamonds through the microscope: G.A. Tombs, 12.

New discovery in Western Australia (tiger's eye and cat's eye opals), 15.

Marco Polo – Gem lover – Part 2, 16-17.

#### Volume 1, Number 7, January 1959

The origin of gems – Part 2: R. Grasso, 6-12.

Asterism in gemstones: N.G. D'Ascenzo, 13-16.

Introducing precious gemstones: A.A. Wirth, 17-19.

Marco Polo – Gem lover – Conclusion, 32.

#### Volume 1, Number 8, February 1959

Testing emeralds, 9-10.

Man-made stones are 'synthetics': The Gemmologist, 12.

#### Volume 1, Number 9, March 1959

The Pearl King – The story of the fabulous Mikimoto: R. Eunson, 7-14.

A link with the Spanish Armada (four ancient pearls), 16-20.

#### Volume 1, Number 10, April 1959

Gemstones and their superstitions: D.R. Walter, 6-11.

The Pearl King (continued): R. Eunson, 18-21.

The Sandawana emerald discovery: D.E. Mayers, 28-29.

#### Volume 1, Number 11, May 1959

Man-made emeralds: E.J. Gubelin, 7.

Know your jadeite: A.A. Wirth, 10-13.

Some notes on a recent West Australian mineral discovery (opalised tiger's eye), 16-17.

The Pearl King (continued): R. Eunson, 18-21.

The birth of the opal (poem), 22.

#### Volume 1, Number 12, June 1959

Emeralds from Sandawana: E.J. Gubelin, 6-20.

The Pearl King (continued): R. Eunson, 31-32.

### Volume 2 July 1959 – June 1960

#### Volume 2, Number 1, July 1959

How to start collecting minerals: D.R. Walter, 6-11.

Synthetic rutile sold under many names, 13-14.

The Japanese opal market: R.B. Stokes, 15-16.

European diamond market report: C.J. Ginder, 19.

The Pearl King (continued): R. Eunson, 22-26.

#### Volume 2, Number 2, August 1959

Overseas gemmological and jewellery trends: J.D. Altmann, 5-7.

A new opal prospect: R.B. Stokes, 8.

Determination of mounted stones: N.F. Lamb, 11.

The Pearl King (continued): R. Eunson, 13-20.

#### Volume 2, Number 3, September 1959

Birthstones – Their history and superstitions: J.M. Wise, 5-10.

How to use a dichroscope: C.J. Parsons, 11-12.

Table of pleochroism, 13.

The Pearl King (continued): R. Eunson, 24-30.

#### Volume 2, Number 4, October 1959

Turquoise imitations: R. Webster, 5-7.

European diamond market report, 12.

Gem cutting, 18-19.

The Pearl King (continued): R. Eunson, 21-30.

#### Volume 2, Number 5, November 1959

Highlights from the gem trade laboratories in New York and Los Angeles - Gems & Gemology, 5.

Lapidary trend in America: K.E. Bensusan, 9-12.

The Rayner gemmological microscope, 13-14.

Jewel exhibition Melbourne 1959, 16-17.

The Pearl King (continued): R. Eunson, 27-30.

#### Volume 2, Number 6, December 1959

Rarest stone in the World (Blue John): D. Thompson, 5.

A visit to the Burra Copper Mine in South Australia: D.R. Walter, 7-10.  
Turquoise: E.P. Van Leuven, 11-14.  
Kuri Bay (Qld): D.R. Walter, 15.  
The Pearl King (continued): R. Eunson, 21-25.

#### **Volume 2, Number 7, January 1960**

Facetted gem stones: cutting for maximum brilliance: O.L. Knight, 5-12.  
Retail jewellers welcome diamond course, 15-16.  
The Pearl King (continued): R. Eunson, 24-28.

#### **Volume 2, Number 8, February 1960**

Ruby: J.R. Holdsworth, 5-8.  
The Pearl King (continued): R. Eunson, 17-22.

#### **Volume 2, Number 9, March 1960**

Properties and classification of individual garnets: B.W. Anderson, 5-12.  
Memories of Western Australian gold rushes – The Larkinvale and Specimen Gully finds: R.J. Beavis, 14-18.  
The Pearl King (continued): R. Eunson, 23-26.

#### **Volume 2, Number 10, April 1960**

The nature of polished metal and stone surfaces, 5.  
Chatham denies FTC charges, 7-8.  
The gold rush, Beechworth (1852), 12-13.  
The Pearl King (continued): R. Eunson, 19-22.

#### **Volume 2, Number 11, May 1960**

Black opal: L. Hudson, 5.  
Opal deposits at the Hayricks opal mine, Quilpie: Queensland Government Mining Journal, 7-16.  
Fishing for truth about R.I.: D.G. Sanderson, 18.  
Life on the goldfields: R.C. Harvey, 20-22.  
The Pearl King (continued): R. Eunson, 26-30.

#### **Volume 2, Number 12, June 1960**

The mechanical properties of solids and their influence on the durability of gemstones, 7-17.  
The Pearl King (continued): R. Eunson, 29-30.

#### **Volume 3 July 1960 – June 1961**

##### **Volume 3, Number 1, July 1960 (OLD SERIES)**

The noble opal of Australia: A.A. Wirth, 6-7.  
Kalgoorlie – El Dorado of the West: R.O. Chalmers, 9-15.  
North America's only diamond field: E.L. Howe, 16-17.  
The Pearl King (continued): R. Eunson, 24-26.

##### **Volume 3, Number 2, August 1960 (OLD SERIES)**

Fire and brimstone: R.O. Chalmers, 5-9.  
Huge gem auction in London, 10.  
A trip to Rubyvale: R. Bykersma, 12-15.

Hopper crystals of quartz from Meelup, Western Australia: J.G. Kay, 16-18.  
The Pearl King (continued): R. Eunson, 24-26.

##### **Volume 3, Number 3, August 1960 (OLD SERIES)**

Diamonds for you: De Beers Consolidated Mines Ltd, 5-11.  
Jade carving: P. Ping-Heng, 13-17.  
Fabulite (Strontium titanate), 18.  
The Pearl King (continued): R. Eunson, 22-26.

##### **Volume 3, Number 1, November-December 1960 (NEW SERIES)**

Gold is where you find it: M. Bracken, 4  
Pearl testing endoscope: Special correspondent, 7-11.  
Opal in the Eulo district: R.R. Dowding, 12-15.  
Yowah opal (a poem): R.R. Dowding, 15.

##### **Volume 3, Number 2, January-February 1961**

Tasmanian jewellery exhibition, 5-7.  
The GAA field day: D.G. Sanderson, 8-9.  
Australia and gemmology: alexandrite: A.A. Wirth, 11-12.

##### **Volume 3, Number 3, March 1961**

The Maori Heitiki: Whitcombe & Tombs Ltd, 5-6.  
Relationship between refractive index and specific gravity: J.R. Tuffley, 7-9.  
Synthetic and cultured gem materials: S. St. J. Warne, 16-19.

##### **Volume 3, Number 4, April 1961**

The rise of the diamond: M.J. Ward, 5-6.  
Protecting a trade, 14-19.

##### **Volume 3, Number 5, May 1961**

Zircon – the mineral and gemstone of rising fame: Professor A.F. Wilson, 6-7, 14.  
Working conditions in a South African diamond mine: W.E. Funston, 8-9.  
Protecting a trade (continued), 15-19.

##### **Volume 3, Number 6, June 1961**

Chiastolites from the Olary Province of South Australia: D.R. Walter, 5-9.

#### **Volume 4 July 1961 - December 1962**

##### **Volume 4, Number 7, July 1961**

New star stones and their antecedents: F.H. Pough, 5-8.  
Figure-O-Scope: J.J. Snow, 9.  
Protecting a trade (continued), 12-14.

##### **Volume 4, Number 8, August 1961**

Artificial colouration of gemstones: R.J. Thorburn, 5-7.  
Kilkivan (Qld): M.W. Shiel, 11-13.  
Protecting a trade (continued), 14-15.

##### **Volume 4, Number 9, September 1961**

Cleavage: J.R. Tuffley, 5-7.

Protecting a trade (continued and end), 10-11.

#### **Volume 4, Number 10, December 1961**

The new synthetic emeralds (Linde, Leichleitner): Jewellers' Circular Keystone, 5-7.

An introduction to the optics of gemstones – Part 1: J. Ostwald, 8-14.

Gemstones of Australia: R.O. Chalmers, 15-17.

Is gemmology enough?: D. Sanderson, 18.

The story of the Allied Jewellery Centre of Victoria, 19, 22.

The Princess cut diamond, 20-21.

Taking gemmology seriously: F.S.H. Tisdall, 26.

The virtues of bloodstone: E.P. Van Leuven, 27-29.

Diamond mining in Yakutia: The Gemmologist, 29-30.

#### **Volume 4, Number 11, March 1962**

Jewelled crafts – An historical survey – Part 1: J. Ostwald, 5-12.

The opal market: J.D. Altmann, 13-14.

An X-ray examination of synthetic spinel: J.R. Tuffley, 15-17.

Is gemmology enough?: A.G. Steele, 17.

An introduction to the optics of gemstones – Part 2: J. Ostwald, 18-22.

Hydrothermal rubies and emerald-coated beryl: E.J. Gubelin, 24-28.

River of jade (BC, Canada), 29-30.

#### **Volume 4, Number 12, June 1962**

An introduction to the optics of gemstones – Part 3: J. Ostwald, 5-9.

Microstructures in opal patch from Andamooka, 9-10.

#### **Volume 4, Number 13, July 1962**

An introduction to the optics of gemstones – Part 4: J. Ostwald, 5-10.

A rare synthetic (silicon carbide, SiC): R.K. Mitchell, 11-12.

#### **Volume 4, Number 14, August 1962**

Jewelled crafts – An historical survey – Part 2: J. Ostwald, 5-10.

The paradox of the “rare” synthetic: J.R. Jones, 11-12.

#### **Volume 4, Number 15, September 1962**

The art and science of gemmology: H.E.E. Brock, 5-8.

Jewelled crafts – An historical survey – Part 2 (continued): J. Ostwald, 8-10.

#### **Volume 4, Number 16, October 1962**

Jewelled crafts – An historical survey – Part 3: M.J. Ward, 5-9.

The Maitland Bar nugget: H.F. Whitworth, 10-11.

#### **Volume 4, Number 17, November 1962**

An introduction to the optics of gemstones – Part 5: J. Ostwald, 5-9.

Howlite: natural and stained: R. Webster, 10-11.

Lapidary equipment and its care: A. Grapes, 11-13.

#### **Volume 4, Number 18, December 1962**

An introduction to the optics of gemstones – Part 6 (concluding): J. Ostwald, 5-10.

Confusion about synthetics: A.E. Alexander, 12.

#### **Volume 5 January 1963 - December 1963**

##### **Volume 5, Number 19, January 1963**

Mineral colour: J. Ostwald, 5-6.

Imitation and treated turquoise: H. Lee, R. Webster, 7-13.

##### **Volume 5, Number 20, February 1963**

An unusual experiment with topaz: J. Ostwald, 5-6.

Imitation and treated turquoise (continued from January): H. Lee, R. Webster, 7-10.

Sorting diamonds by light, 11-12.

Superstitious? The effect of colour, 13-14.

Research on opal, 14-15.

##### **Volume 5, Number 21, March 1963**

The gemstones and jewellery of prehistoric India: J. Ostwald, 5-7.

The pride of India: T.J. Brock, 8.

Green gold: R.B. Stokes, 9-10

Superstitious? The use of gemstones as healing agents, 11-12.

##### **Volume 5, Number 22, April 1963**

The measurement of colour and pleochroism in crystals and gemstones: J. Ostwald, 5-8.

Tooth turquoise – Odontolite: O. Mate, 9.

##### **Volume 5, Number 23, May 1963**

Ancient Greek gemstones and jewellery: J. Ostwald, 5-9.

History of the arts and crafts of India: T.J. Brock, 10-12.

##### **Volume 5, Number 24, June 1963**

Ruby and sapphire: R. Webster, 5-8.

Ancient jewelled craft: P. Oesterlin, 9-10.

##### **Volume 5, Number 25, July 1963**

Presidential address: Professor H.C. Bolton, 5-7.

Hungarian opal: O. Mate, 8-9.

Ruby and sapphire (continued from June): R.

Webster, 10-11.

##### **Volume 5, Number 26, August 1963**

Etruscan gemstones and jewellery: J. Ostwald, 5-6.

Ruby and sapphire (continued from July): R. Webster, 7-8.

From rockhounds to rare gems in America: G.V. Axon, 9-10.

Colour of prase and chrysoprase: P.A. Males, 11-12.

Non-nucleated pearls now on the UK market: Retail Jeweller, 12.

#### **Volume 5, Number 27, September 1963**

Burmese gems: D.R. Walter, 5-8.

Crystals: D.R. Walter, 9-11.

#### **Volume 5, Number 28, October 1963**

Burmese gems (continued from September issue): D. R. Walter, 5-7.

Crystals – Part 2: D.R. Walter, 8-9.

A note on cancrinite: J. Ostwald, 10.

A trip through a treasure house: G.V. Axon, 11-13.

#### **Volume 5, Number 29, November 1963**

Crystals – Part 2 (cubic): D.R. Walter, 5, 7-8.

Pet aversions: S.J. Squires, 9.

#### **Volume 5, Number 30, December 1963**

Atoms in crystals: Professor H.C. Bolton, 5-12.

#### **Volume 6 January 1964 - December 1964**

##### **Volume 6, Number 31, January 1964**

Crystals – Part 3 (tetragonal): D.R. Walter, 5, 7-8.

An unusual colour pattern in precious opal from Andamooka: P.A. Males, 9.

Trace elements and colour in minerals and gemstones: G.J. Troup, 10-13.

##### **Volume 6, Number 32, February 1964**

Crystals – Part 4 (hexagonal): D.R. Walter, 5, 7-8.

Relics of the past: F. Dowding, 10-11.

The case of the missing gemmologist: G.V. Axon, 12-14.

##### **Volume 6, Number 33, March 1964**

Crystals – Part 5 (orthorhombic): D.R. Walter, 5, 7.

Gem Safari (Agate Creek): D. Bolton, 8-9.

Light-polish-orientation of gemstones: E.C. Parrott, 10-11.

Black-eyed Susan (spectroscope): I. Rhys, 11-14.

##### **Volume 6, Number 34, April 1964**

Crystals – Part 6 (monoclinic): D.R. Walter, 5, 7. Roman gemstones and jewellery: J. Ostwald, 10-11.

##### **Volume 6, Number 35, May 1964**

Crystals – Part 7 (triclinic): D.R. Walter, 5.

On the microstructures and origin of emerald: J. Ostwald, 7-10.

##### **Volume 6, Number 36, June 1964**

The origin and nature of Thunder Eggs: Professor W.H. Bryan, 5-9.

Quality of pearls, 11.

##### **Volume 6, Number 37, July 1964**

Fossicking for sapphires: V. Gorton, 5-8.

Trade and commodity notes: Australian gemstone industry, 9-10.

Idar-Oberstein: A.J. Breebaart, 10-11.

Emeralds are created, 13.

##### **Volume 6, Number 38, August 1964**

Two new synthetic emeralds: E.J. Gubelin, 5-11.

Diamonds under town, 14.

Synthetic quartz crystals in 21 days, 15.

##### **Volume 6, Number 39, September 1964**

Scientific gemmology and its future: J. Ostwald, 5-7.

Australia and gemmology: A.A. Wirth, 7.

Chrome diopside cat's eyes: G.A. Bruce, 8.

Jasper-opal associated with diatomite from Cooma, NSW: P.A. Males, 9-10.

##### **Volume 6, Number 40, October 1964**

Chalcedony and jasper from a pebble beach, Coalcliff, NSW: P.A. Males, 5-7.

Australia and gemmology: A.A. Wirth, 8.

Sodalite as a gemstone: J. Ostwald, 9-10

The zoisite, 10-11.

Chrome diopside cat's eyes (continued from September): G.A. Bruce, 12.

##### **Volume 6, Number 41, November 1964**

Presidential address: Professor H.C. Bolton, 5-6.

Quartz matrix opal: W. Funston, P.J. Darragh, A.J. Gaskin, 7-8.

Crystals, 9-10.

Artificially coloured diamonds, 11.

Chalcedony, 12-13.

Attention! Fabulite – Strontium Titanate, 13.

##### **Volume 6, Number 42, December 1964**

Corundum – Part 2: A.A. Wirth, 5-9.

Mr & Mrs Y. Mikimoto in Australia, 10-11.

Gemmology – An ideal hobby for teenagers, 11-12.

#### **Volume 7 January 1965 - December 1965**

##### **Volume 7, Number 43, January 1965**

Corundum – Part 3: A.A. Wirth, 5-7.

The opal, gem of mystery, 11.

##### **Volume 7, Number 44, February 1965**

Gemstones and gemmology, Corundum – Part 4: A.A. Wirth, 5-7.

Old diamond mine at Mittagong, NSW: G.A. Tombs, 8-9.

Matrix opal, Andamooka, SA: P.A. Males, 10-11.

**Volume 7, Number 45, March 1965**

Gemstones and gemmology, Corundum – Part 4 (continued): A.A. Wirth, 5-7.  
Patents issued for diamond manufacture, 8.  
Microtexture of gem chrysoprase from Queensland: P.A. Males, 10-11.

**Volume 7, Number 46, April 1965**

The problems of damaged gemstones: R. Webster, 5-6.  
Apatite hairstone from the NT: P.A. Males, 7-8.  
Gemstones and gemmology (continued): A.A. Wirth, 8.  
The origin of colour in opal: P.J. Darragh, J.V. Sander, 9-12.

**Volume 7, Number 47, May 1965**

Presidential address: Professor H.C. Bolton, 5-7.  
Australia and gemmology: emerald by man: A.A. Wirth, 8-9.  
Amber: A.A. Wirth, 9,11.  
Gemstones in Finland: J.C. Rufi, 12-13.  
Synthetic opals search: Sun Herald, 13-14.

**Volume 7, Number 48, June 1965**

The geology of Australian gemstone deposits: J.C. Liddy, 5-8.  
Gemstones and gemmology, synthetic corundum: A.A. Wirth, 9-11.  
Home comforts at Andamooka: L.R. Kavanagh, 12.

**Volume 7, Number 49, July 1965**

Inclusions in NSW gemstones: E.L. Stevens, 5-7.  
The geology of Australian gemstone deposits: J.C. Liddy, 8-11.  
Symerald – A new synthetic emerald, 12-13.

**Volume 7, Number 50, August 1965**

Inclusions in NSW gemstones (continued from July issue): E.L. Stevens, 5-7.  
Crystal growth techniques – Part 1: E.A.D. White, 7-9.  
Classification of growth techniques, 9-10.

**Volume 7, Number 51, September 1965**

Australia and gemmology: A.A. Wirth, 5-6.  
Crystal growth techniques – Part 2: E.A.D. White, 7-10.

**Volume 7, Number 52, October 1965**

A new hydrothermal emerald: Linde Division, 6.  
Crystal growth techniques – Part 3: E.A.D. White, 7-10.  
Derivation of gem names, 11-13.

**Volume 7, Number 53, November 1965**

Synthetics: J.R. Jones, 5-6.  
Crystal growth techniques – Part 4: E.A.D. White, 7-10.  
Geology of South Eastern Queensland: M. Russell-Smith, 11.

**Volume 7, Number 54, December 1965**

Gemstone mining in Thailand: R.H. Ruzic, 5-7.  
Where to from here?, 8-11.  
Cheap gem testing methods: A.E. Farn, 12-13.

**Volume 8 January 1966 - December 1966****Volume 8, Number 55, January 1966**

The geological environment of Australian precious opal: P. A. Males, 5-7.  
The use of the hand spectroscope in quick gem testing: R. Thurm, 8-11.  
We can't please everybody!, 12-13.

**Volume 8, Number 56, February 1966**

Developing the powers of observation in gem testing: R.T. Liddicoat Jr., 5-8.  
Green quartz and aventurine: P.A. Males, 9-11.  
The hand spectroscope (continued from January issue): R. Thurm, 12-13.

**Volume 8, Number 57, March 1966**

Developing the powers of observation in gem testing – Part 2: R.T. Liddicoat Jr., 5-8.  
Mount Franklin, 9,11.  
Diamond awards, 11.  
Boulders of opal: L.G. Cram, 12-13.  
The hand spectroscope: R. Thurm, 14.

**Volume 8, Number 58, April 1966**

Scientists solve a diamond mystery – Research in South Africa, 5-6.  
The terminology of gem colours: C.J. Parsons, 7-9.  
Developing the powers of observation in gem testing – Part 3: R.T. Liddicoat Jr., 11.  
The pleasures of collecting: G.V. Axon, 12-13.

**Volume 8, Number 59, May 1966**

Gem testing with a lens – and know-how: A. Farn, 5-8.  
Gem lore in oriental mythology: R.H. Ruzik, 9.  
The gem cutter: P.W. Leadbeater, 10-11.  
The cobra stone – A legend of India, 12.

**Volume 8, Number 60, June 1966**

Restrictions on opal buying, 4.  
Federal president's address to conference: Professor H.C. Bolton, 5-6.  
Cabochon R.I. determined by refractometer, 9.  
The cultured pearl – Its history and development to the present day – Part 1: C.D. George, 10-12.

**Volume 8, Number 61, July 1966**

Modern pearl culture started in Australia: C.D. George, 5-7.  
Release of wartime diamonds, 7.  
The cutting of diamonds: R.D. Turner, 10-11.  
The basic instruments to start your own gemstone testing: A.E. Farn, 12.

**Volume 8, Number 62, August 1966**

Pirates at Agate Creek, 5-6.  
 Diamonds – A rise in price, 6.  
 The cultured pearl – Production methods: C. D. George, 7-10.  
 Colour banding in sapphire, 11.

**Volume 8, Number 63, September 1966**

The sapphire fields of Anakie: O. Andersen, 5-7.  
 The cultured pearl – Production methods: C.D. George, 8-10.  
 A new doublet (synthetic spinel & fabulite), 10.  
 Ornamental stones: R.O. Chalmers, 11-12.  
 New on the market (opal triplet), 12

**Volume 8, Number 64, October 1966**

Japan's pre-eminence in pearl culture: C.D. George, 5-7.  
 Olivine in Victorian volcanic bombs: A.W. Beasley, 8-9.  
 Opal pseudomorphs and the candle-box trade  
 From 'They Struck Opal': F.E. Murphy, 10-13.

**Volume 8, Number 65, November 1966**

Some notes on gem mining in Ceylon: L. C. Siedle, 5-7.  
 Japan's pre-eminence in pearl culture  
 (continued): C.D. George, 9-11.  
 Bronzite from Anakie, Queensland: A.M. Taylor, 12-13.

**Volume 8, Number 66, December 1966**

The nature and origin of opal: P.J. Darragh, A.J. Gaskin, 5-9.  
 The 11th International Gemmology Conference, Barcelona, 1966: R.O. Chalmers, 10-12.  
 Australia and gemmology – Nomenclature and trading: A.A. Wirth, 13-14.  
 Current trends in the pearl industry: C.D. George, 15-18.  
 Go to Andamooka: G. Woods, 19-21.

**Volume 9 January 1967 - November 1967****Volume 9, Number 67, January 1967**

Iris-opal from Mexico: J. Sinkankas, 5-7.  
 Opalised 'steel band' from Lightning Ridge, 8.  
 Australia's position in the pearl industry: C.D. George, 9-10.  
 11th International Gemmology Conference: K. Cronstedt, 11-13.

**Volume 9, Number 68, February 1967**

Gemmology on a shoestring: B.W. Anderson, 5-9.  
 Gem cutting in Ceylon: L.C. Siedle, 10-12.

**Volume 9, Number 69, March 1967**

Synthetic diamonds: H.C. Bolton, 5-10.  
 Gemmology on a shoestring – Part 2: B.W. Anderson, 11-16.

**Volume 9, Number 70, April 1967**

Massive thulite from Roebourne, WA: A.M. Taylor, 5-6.  
 Nomenclature and trading Part 2: A.A. Wirth, 7-9.

**Volume 9, Number 71, May 1967**

The gemstones of America: G.V. Axon, 5-6.  
 Nomenclature and trading Part 3: A.A. Wirth, 7-9.  
 Watch these green stones: J.H. Oughton, 12-13.

**Volume 9, Number 72, June 1967**

Geology and gemming: Professor R.T. Prider, 6-10.  
 The GAA comes of age: M. Soklich, 11-12.  
 Technical review: opal geology: J.H. Oughton, 13.

**Volume 9, Number 73, July 1967**

New light on the world's rarest gem (taaffeite): M. Symons, 5-6.  
 Amethyst from Onslow, WA: H.F. Whitworth, 7.  
 Nomenclature and trading Part 3 (continued): A.A. Wirth, 9-11.

**Volume 9, Number 74, August 1967**

The origin of negative crystals in gemstones: W.F. Eppler, 6-11.  
 Nomenclature and trading Part 3 (continued): A.A. Wirth, 15-16.  
 Ceylonese jewellery through the ages: L.C. Siedle, 17-19.  
 The very first gemmologist's compendium: J.H. Oughton, 20-26.

**Volume 9, Number 75, November 1967**

Synthetic beryllia crystals: N.R. McDonald, 7-9.  
 Synthetic vanadium emerald: A.M. Taylor, 10-13.  
 A new taffeite discovered: G.A. Bruce, 14.  
 Nomenclature and trading Part 3 (continued): A.A. Wirth, 15-17.  
 Phosphorescence in Australian opal: P.A. Males, 18.  
 Diffraction gratings: C.K. Coogan, 19-26.  
 Stones seen, 27-28.

**Volume 10 February 1968 - November 1970****Volume 10, Number 1, February 1968**

Three generations of gem merchants in Ceylon: L.C. Siedle, 7-17.  
 Gems (a poem): N.P. Jamison, 17  
 Handling and care of gemstones: G.A. Tombs, 18.  
 The care and cleaning of jewellery: A. Clark, 19.  
 Nomenclature and trading Part 3 (continued): A.A. Wirth, 21.  
 Precious opal in an unusual environment: P. Males, 24.

**Volume 10, Number 2, May 1968**

Pegmatites and gem minerals: R.T. Prider, 7-10.

The identification of lost or stolen jewellery and gemstones: photography as an aid to recovery: F.B. Cocks, 11-14.

Western Australian emeralds: J.E. Glover, 15-16.

Natural and synthetic emerald: F.S.H. Tisdall, 18-20.

Nomenclature and trading Part 3 (continued): A.A. Wirth, 21-23.

Stones seen: J.T. Oughton, 24-26.

What is true jade?: G.A. Tombs, 28.

The magic spell of Idar-Oberstein: G. Woods, 29.

#### **Volume 10, Number 3, August 1968**

Zoisite: A new and unique gem: G.A. Bruce, 7-8.

The identification of lost or stolen jewellery and gemstones: photography as an aid to recovery Part 2: Photomicrography of inclusions in gemstones: F.B. Cocks, 9-12.

Pseudophite and precious serpentine: P.A. Males, 13-15.

Around his World in 80 years - A tribute to Prof. Dr K. Schlossmacher: R. Wolf, 15.

The Darya-I-Nur diamond and the Tavernier Great Table: V.B. Meen, A.D. Tushingham, G.G. Waite, 16-25.

Stones seen: J.H. Oughton, 26-29.

#### **Volume 10, Number 4, November 1968**

The problems of amethyst: A.C. McLaren, 7-9.

Opal in volcanic rock: P.A. Males, 9-11.

The Identification of lost or stolen jewellery and gemstones: photography as an aid to recovery Part 3: Photomicrography of inclusions in gemstones: F.B. Cocks, 12-18.

The direct vision spectroscope: J.H. Oughton, 21-27.

Combined light and spectroscope: J.J. Snow, 28-29.

Nomenclature and trading Part 3 (continued): A.A. Wirth, 30-31.

Stones seen: J.H. Oughton, 32-33.

#### **Volume 10, Number 5, February 1969**

The alexandrite effect: G.J. Troup, 9-12.

Basil Anderson looks back: B.W. Anderson, 13-20.

Modern reefs: E.A. Sanders, 21-25.

Infra-red photography: J.J. Snow, 26-27.

Stones seen: J.H. Oughton, 28-30.

#### **Volume 10, Number 6, May 1969**

Metamorphism and gemstone formation: R.T. Prider, 7-9.

A new occurrence of precious opal of volcanic origin near Mullumbimby: R.O. Chalmers, 10-13.

The first discovery of Australian opal: N. Clayton, 13-14.

Cameos and intaglios: P.W. Leadbeater, 15-17.

Hexagonal diamond - A new crystal form: H.C. Bolton, 18-20.

The 12th International Gemmological Conference October 6-10, 1968, Stockholm: K. Cronstedt, 20-21.

A new polariscope and conoscope: R. Thurm, 22-24.

Stones seen: J.H. Oughton, 29-30.

#### **Volume 10, Number 7, August 1969**

Nomenclature and the law: J.H. Oughton, 5-6.

Microtextures of Australian chalcedony, chert and jasper: P.A. Males, 9-14.

French government decree to stop fraudulent gem trading, 15-18.

The radiofrequency spectra of gemstones: G.J. Troup, 19-22.

The great Australian amethyst mine: K. Cronstedt, 23-24.

Tiger's eye and crocidolite: J.H. Oughton, 24.

Stones seen: J.H. Oughton, 26-33.

#### **Volume 10, Number 8, November 1969**

Volcanic gem opals: the result of an examination by electron microscope: P.J. Darragh, J.V. Sanders, 5-8.

The Barkley Highway murder: F.B. Cocks, 9-11.

Call them what they are: Esther Hendler's gem-name crusade: A. Ward, 12-14,

Colour changes in elbaite tourmaline from Ravensthorpe, Western Australia: P.L.C. Grubb, T.H. Donnelly, 15-18.

Electron microprobe analysis: E. Gubelin, 20-25.

The absorption spectra and luminescence of the blue, green and yellow colours of synthetic spinels: R. Webster, 27-28.

Boron: An ultra-hard synthetic gem: C.H.L. Kennard, 28-29.

Stones seen: J.H. Oughton, 30-33.

#### **Volume 10, Number 9, February 1970**

Forensic problems in jewellery: R. Webster, 7-13.

The green vault in Dresden: K. Cronstedt, 14-16.

What now for the individual prospector?: A. Stevenson, 17-18.

The publication explosion: P.B. Lapworth, J.H. Oughton, 19-22.

Notes on the application of the electron probe micro-analyser: R.F. Symes, 24-26.

A new synthetic emerald and a simulated diamond, 30.

#### **Volume 10, Number 10, May 1970**

Opal in the nickel search in Western Australia: R.T. Prider, 7-11.

A new design for brilliance plus dispersion: S. Suzuki, 13-24.

The N.Q. cut: H. Wheeley, 25-26.

Zircon phenomenon: G.A. Tombs, 26.

The museum: P.W. Leadbeater, 27-29.

Proposal for a Scandinavian diamond nomenclature: G.A. Tombs, 30.  
A brief account of the search for diamonds in Australia: A.C.T. Joris, 31-32.

#### **Volume 10, Number 11, August 1970**

Yellow sapphire – Natural or synthetic: J.H. Oughton, 5-8.  
A method for differentiation of natural from synthetic yellow sapphires: D.H. McColl, 9-11.  
Synthetic gem diamonds, 12.  
Some recent advances in scientific understanding of gemstones: H.C. Bolton, 13-16.  
Fingerprinting of jewellery: R. Webster, 17-23.  
Stones seen: J.H. Oughton, 24-25.  
Look through your magnifying glass: R. Wolf, 29-30.  
The individual prospector: C.H. Coodall, 31.

#### **Volume 10, Number 12, November 1970**

The first gem quality synthetic diamonds grown by GEC scientists, 5-7.  
Several simple tests can identify the man-made diamonds: R. Crowningshield, 7-9.  
A case for international agreement about ruby: J.H. Oughton, 10-11.  
What exactly is ruby?: P.B. Lapworth, J.H. Oughton, 11-14.  
Legal recognition of the Diploma: P.W. Leadbeater, 15.  
Stones seen: J.H. Oughton, 20-21.  
Ultimate gem authority, 26

#### **Volume 11 February 1971 - November 1973**

##### **Volume 11, Number 1, February 1971**

The spectroscope: measuring wavelengths without a built-in scale: H.A. Mortley, 3-4, 27.  
A geological curiosity: C.A. Schiffmann, 5-8, 26.  
Modern synthetic gemstones, Part 1 (A-L): R. Webster, 9-24.  
Stones seen: J.H. Oughton, 25.

##### **Volume 11, Number 2, May 1971**

Mineralogy and metallurgy of gold: H.W. Fander, 3-4.  
Gemstones in the system BeO-MgO-Al<sub>2</sub>O<sub>3</sub>: D.R. Hudson, 5-9.  
Modern synthetic gemstones, Part 11 (M-Z): R. Webster, 11-22.  
The classification of black opal: N.S.W. Opal Research Group, 24.  
Some thoughts on opal: J.H. Oughton, 24.  
A basis for classification (opal): N. Clayton, 25-26.  
GAA definition of black opal, 26.  
The myth of the Geierstein opal: P.B. Lapworth, 27, 32.  
Comments on 'A new design for brilliance plus dispersion': W.R. Eulitz, 28-32.

##### **Volume 11, Number 3, August 1971**

More confusion with synthetic yellow sapphire: D. McColl, J.H. Oughton, 3-5.  
Key for identification of common cut and uncut gemstones: D.R. Hudson, 6-7.  
Diamonds from seawater: P.W. Leadbeater, 8-10.  
A century of sapphire mining: O. Anderson, 11-20.  
A scanning microscope study of the morphology of opal: E.R. Segnit, C.A. Anderson, J.B. Jones, 21-25.  
Stones seen: J.H. Oughton, 26-27.

##### **Volume 11, Number 4, November 1971**

Adhesives: H.W. Fander, 3-4.  
A problem in diamonds: R. Webster, 5-6.  
Photomicrography without a camera: C. Lang, 7-12.  
Discourse on valuation principles: G.A. Tombs, 13-16.  
Black opal nomenclature: A. Kalokerinos, 16.  
Fakes and frauds – Caveat Emptor: J.H. Oughton, 17-22.  
Reply to Dr Eulitz's comment: S. Suzuki, 25-27.  
Spotted matrix opal: P.A. Males, 27-28.  
Big WA emerald crystal: H.R. Perry, 29.

##### **Volume 11, Number 5, February 1972**

Rutilated quartz and ilmenite: P.A. Males, 3-4.  
Another colour-changing sapphire: J.H. Oughton, 4.  
Gemstones in the system BeO-MgO-Al<sub>2</sub>O<sub>3</sub>-SiO<sub>2</sub>: D.R. Hudson, 5-7.  
Brazilianite: R.J. Reeve, 8-10.  
New occurrences of gem minerals in Australia: R.O. Chalmers, 10-12.  
Labradorite location in central Queensland: J.H. Oughton, 12.  
Red diamonds from Siberia: International Diamonds Annual, 14-20.  
The Scandinavian diamond nomenclature: H. Tillander, 21-22.  
Opal nomenclature discussion, 23-24.  
Stones seen: J.H. Oughton, 26-28.

##### **Volume 11, Number 6, May 1972**

Some experiences and investigations into damage to gem materials: R. Webster, 3-8.  
Valuation principles as applied to coloured gemstones: G.A. Tombs, 9-14.  
Doublets: A continuing factor in the gemstone market: P.C. Callaway, 15-17.  
Are you sure it's topaz?: F.H. Pough, 17-19.  
Russian synthetic diamond made in 1967, 19.  
Wrong to use Mohs to measure hardness?: The Canadian Jeweller, 20-22.  
Fluorite: H.W. Fander, 25.

##### **Volume 11, Number 7, August 1972**

Why crystallography?: P.A. Males, 4-6.

The law and the role of gemmology: R. Webster, 7-16.

Lightning Ridge nobbies and the 'Chinaman's hat': P.A. Males, 17-18.

Gemmology in Japan: D. McLoughlin, 18-19.

Optical and radio frequency spectroscopy of impurities in blue zoisite: P.J. Beckwith, D.R. Hutton, G.J. Troup, 20-22.

New mosaic triplet: S. Suzuki, 23, 32.

Introduction of gemmology: Part 1. Basic chemistry: GAA (Victorian Branch), 24-27.

#### **Volume 11, Number 8, November 1972**

Inclusions in gemstones: E. Guebelin, 3-14.

Diamond, YAG and other simulants: J.H. Oughton, 15-18.

Meet Tanzania's fancy sapphires: F.H. Pough, 19-21.

Stones seen, 23-28.

#### **Volume 11, Number 9, February 1973**

Some archaic instruments in present day use: J.H. Oughton, 4-13.

A new style of Rayner refractometer (Dialdex): J.H. Oughton, 14.

Inclusions in opal: investigation of crystal inclusions in a black patch 'nobby' from Lightning Ridge, NSW: P.A. Males, 15-16.

What is this thing called hardness?: V.J. Hearn, 16-17.

#### **Volume 11, Number 10, May 1973**

Amber, the gold of the North: E.R. Sasnaitis, 3-7.

The 14th International Gemmological Conference, Switzerland: K. Cronstedt, 11-13.

Sapphire mining in northern New South Wales: T.S. Coldham, 14-19.

Intriguing discoveries about growth in diamonds: S. Tolansky, 21-25.

New England rubies: J.H. Oughton, 27.

Stones seen, 28-31.

#### **Volume 11, Number 11, August 1973**

Observations on historical shapes of gem diamond: H. Tillander, 3-6.

Irradiation of gemstones: I.A. Mumme, 7-10.

Synthetics – Their production and detection: J.L. O'Loughlin, 11-13.

Sapphire mining in New South Wales: A.A. MacNevin, 14-16.

Precious opal – Developments towards synthesis: P.J. Darragh, J.L. Perdris, 17-21.

Diamond prospecting: M.J. Lawrence, 22-29.

Opal classification: J.H. Oughton, 31.

#### **Volume 11, Number 12, November 1973**

Gems of special importance in the great museum collections: H.J. Schubnel, 3-10.

The art of Niello: D. McLoughlin, 11-15.

Scanning electron microscopy and opals: R.A. Ball and A.S. Malin, 16-19.

A member of the ugrandite garnet series found in Western Australia: R.L. Burns, 19-20.

Some gem-bearing pegmatites near Coolgardie, WA: R.J. Reeve, 21-22.

Stones seen: J.H. Oughton, 25-27.

#### **Volume 12 February 1974 - November 1976**

##### **Volume 12, Number 1, February 1974**

Gemmology under difficulties: W. Gower, 3-4.

Gem quality kyanite crystals from the Harts Range, Northern Territory: P.A. Males, 5-8.

Stones seen and discussed, 9-10.

Ilmenite crystals associated with rutilated quartz, from Brazil: P.A. Males, 11-12.

Real synthetic alexandrite! & paramagnetic star diopside, 13.

Iridescence in marine shells: R.A. Ball, A.S. Malin, 14-15.

Some thoughts about agate formations of Scotland: S. Sim, 16-19.

##### **Volume 12, Number 2, May 1974**

Gemstones in and out of the Australian Museum collections: F.L. Sutherland, J.E. Hingley, 31-35.

"1925 ... and all that": B.W. Anderson, 36-41.

The jet age: Professor C. E. Marshall, 42-55.

Discussion on agate: R.A. Ball, 55.

Brazilian precious opal: P.A. Males, 56-57.

##### **Volume 12, Number 3, August 1974**

Short cuts to certainty: B.W. Anderson, 71-74.

A gemmological study of emerald from Poona, WA: J.M. Graindorge, 75-80.

'Pilbarra jade': H.W. Fander, 80.

Synthetic diamonds: H.C. Bolton, 81-83.

Industrial diamonds: G.J. Gellie, 84-88.

Liesegang rings: R.A. Ball, 89-91.

Mexican onyx and other marbles: P.A. Males, 92-94.

Synthetic-like fluorescence in a natural sapphire: G. Tombs, 94.

Further comments on the double dispersion design: S. Suzuki, 95-97.

Consumer protection in the limelight: J.H. Oughton, 98, 101.

##### **Volume 12, Number 4, December 1974**

Treated stones: J.H. Oughton, 111-118.

A survey of some research work on impurities in gems: C.M. Scala, 119-124.

Peridot on Ross Island, Antarctica: A.T. Wilson, C.H. Hencly, A.M. Taylor, 124-125.

"Pilbara jade": D.R. Hudson, 127-133.

The phantom table: P.W. Leadbeater, 135.

New mining legislation in New South Wales, 140.

##### **Volume 12, Number 5, February 1975**

Agate Part 1: A review – Genesis and structure: R.A. Ball, R.L. Burns, 143-150.

Emerald occurrence near Menzies, Western Australia: G.B. Whitfield, 150-152.  
 Classification and nomenclature of precious opal: N.A. Clayton, 152-154.  
 Precious opal in Queensland: B.R. Senior, 155.  
 The discovery of cap-quartz in northern NSW, Australia: R.E. Brown, 156-159.  
 Electromagnetic resonance in yellow sapphires: E.N. Barrington, 159-160.  
 A definitive test for golden sapphires: C.M. Scala, D.R. Hutton, 160-161.  
 Jade imitators: J.H. Oughton, 161.

#### **Volume 12, Number 6, May 1975**

Opal from Coolgardie, Western Australia: R.A. Ball, 171-173.  
 Rocks, gems and minerals of Olary: I.A. Mumme, 173-178.  
 Notes on identification of Gilson synthetic opals: G.A. Tombs, 179-180.  
 Opal references and abstracts: R.A. Ball, N. Clayton, 181-189.  
 Stones seen in shop windows: L. Sabine, 191-192.

#### **Volume 12, Number 7, August 1975**

Quo Vadis, Gemmarius?: C.E. Marshall, 203-208.  
 Chinaman's hats: K.A. Sheens, 208-209.  
 Stones seen: K. Cronstedt, 209.  
 Crystallography is fun: J. & P. Sutton, 210-220.  
 Nephrite jade deposits, Cowell, South Australia: D. Nichol, 220-221.  
 New synthetic gems set a problem: J.H. Oughton, 222-226.

#### **Volume 12, Number 8, November 1975**

On the origin of volcanic opal from Houghlahan's Creek: I.A. Mumme, L. Seibright, R. Ball, 235-240.  
 The radiopacity of some common gem materials: G. Brown, A.J. Moule, R.L. O'Neil, 241-247.  
 Jet: P. Lapworth, 248-250.  
 Mineral collecting: W. Birch, 251-252.  
 Stones seen: L. Hennessy, C. Eglington, 258.

#### **Volume 12, Number 9, February 1976**

J.H. Oughton Memorial Issue  
 A tribute to John H. Oughton: R. Wolf, 264.  
 The late J.H. Oughton: P.B. Lapworth, 265-266.  
 Fakes and frauds - Caveat Emptor: J.H. Oughton, 267-272.  
 Diamond, YAG and other simulants: J.H. Oughton, 272-275.  
 The direct vision spectroscope: J.H. Oughton, 276-282.  
 Where to from here?: J.H. Oughton, 283-285.  
 A review of the thermal properties of natural gem diamonds: P.R.W. Hudson, 286-290.

#### **Volume 12, Number 10, May 1976**

Gold in jewellery: M.J. Cole, 299-302.

Quartz polyhedroids in Australia: B.M. England, 303-306.  
 Thailand - Gem cutting and trading: J.A.L. Pavitt, 307-309, 318.  
 Ruby corundum from the Harts Range, NT: P.A. Males, 310-312.

#### **Volume 12, Number 11, August 1976**

Calculating radio radiopacity: H. Magryn, 323-326.  
 Indonesian opal: B. O'Leary, R.A. Ball, 327-329.  
 Stones seen, 330.  
 Horn – Some aspects of interest to gemmologists: G. Brown, 331-338.  
 The electropolishing of precious metals and their alloys: J.M. Newburn, 339-346.

#### **Volume 12, Number 12, November 1976**

Opal in south western Queensland: R.A. Ball, A. Daniels, 359-363.  
 Two interesting zinc minerals: M.J. O'Donoghue, 364.  
 Emeralds – Three for \$1.50: B. Chambers, 365-370.  
 Two new precious corals from Hawaii: G. Brown, 371-377.  
 Abstracts of the 25th International Geological Congress, 378-382.

#### **Volume 13 February 1977 - November 1979**

##### **Volume 13, Number 1, February 1977**

Black opal: B. O'Leary, 3-11.  
 The structural characteristics of elephant ivory: G. Brown, A.J. Moule, 13-17.  
 GIA debuts new educational centre, 19.  
 The geology of the moon: A.J.W. Gleadow, 22-27.

##### **Volume 13, Number 2, May 1977**

Black coral – True or false: G. Brown, 35-41.  
 The 'jeweller's eye': R. Webster, 43-46.  
 Drought bonanza for prospectors, 46.  
 The structural characteristics of various ivories: G. Brown, A.J. Moule, 47-60.  
 Did you know?, 62-64.

##### **Volume 13, Number 3, August 1977**

A goldsmith's workshop in Roman Britain: P.A. Clayton, 67-69.  
 Paste or glass: J. Snow, 71-74.  
 How to buy a pearl: E. Kihara, 75-77.  
 The alteration of colour of gemstones: E. Skinner-Nixon, 85-88.

##### **Volume 13, Number 4, November 1977**

Some exotic minerals of western Tasmania: W.E. Baker, 99-103.  
 Natural or synthetic opal?: R.A. Ball, 104-105.  
 Electron spin resonance of emeralds: D.R. Hutton, E.N. Barrington, 107-108, 117-118.

Synthetic opal: P.J. Darragh, A.J. Gaskin, J.V. Sanders, 109-116.

Viking treasures, 120.

That looks interesting let's put it under the microscope: D. Smith, 121-126.

The atomic lattice of gold: Gold Bulletin, 127.

### **Volume 13, Number 5, February 1978**

Identification of synthetic opal: R.A. Ball, 131-133.

The burinut - A new source of vegetable ivory: G. Brown, 134-140.

Why a diamond?: Adamas, 141-143.

Historical diamonds – Dresden Green: De Beers Consolidated Mines, 144-145.

Slocum stone: P.J. Darragh, J.V. Sanders, 146-148.

From Russia with 'kimberlite': Retail Jeweller, 150.

Opium dealers are switching to jade, Retail Jeweller, 153-155.

Imitation opal: R.A. Ball, 156-158.

The first tool of gemmology won't cost you a penny: W.D. Hanneman, 159-160.

### **Volume 13, Number 6, May 1978**

A question of colour: A. Farn, 163-165.

New diamond simulant may fool the unwary: A. Hodgkinson, 165-168.

Coral returns to fashion: Retail Jeweller, 169-171.

Notes on sapphires from stream gravels at Frazer's Creek in Glen Innes area, NSW: I.A. Mumme, R.A. Ball, 173-175.

Gamma-ray spectrophotometry (corundum), 176.

The Little River sapphire lease: I.A. Mumme, 177-179, 182-185.

Historical diamonds (Idol's eye, Hope): De Beers Consolidated Mines, 180-181.

Heat treatment of Australian blue sapphires: G.A. Tombs, 186-188.

### **Volume 13, Number 7, August 1978**

The refractory metamorphic gemstones of Australia: A.F. Wilson, 203-209.

A note on the structure of the fire agate: R.A. Ball, 210-211.

AJA-GAA co-operation – Fact or mythology: G. Brown, 213-218.

Historical diamonds: De Beers consolidated Mines, 220-221.

The star of Sierra Leone: De Beers Consolidated Mines, 222-224.

Kauri gum: G. Brown, 225-231.

Idar-Oberstein: S. & H. Martin, 232-235.

Irradiation of gemstones: I. Mumme, 236.

The production of interference by the Figure-O-Scope: J. Snow, 237.

The identification of some rare organic gem materials: G. Brown, 238-239.

### **Volume 13, Number 8, November 1978**

Before the gems came the crystals: A.E. Alexander, 247-250.

Crystal imperfections in natural gem diamond: P.R.W. Hudson, 253-258.

Recognition of synthetic opal: N.P. Jamieson, 259-260.

Gemmological literature you should read: G. Brown, 261-262.

On diamonds: De Beers consolidated Mines, 263-270.

New opal imitation: Gemmological Study Group, G. Brown, 273.

The colouration of Mt. Surprise topaz by gamma irradiation: I.A. Mumme, L. Seibright, 274-277.

Testing by touch: J.C. Ellison, 279-279.

The Far Eastern gem deposits: A.E. Alexander, 280-284.

How to feel the difference between a diamond and a cubic zirconia: H. Anderson, 285-286.

### **Volume 13, Number 9, February 1979**

Rhodonite or pink jasper: R.B. Kelly, 291-295.

Porous Gilson synthetic black opal: A.D.C. Robertson, 297-299.

The use of the Figure-O-Scope in gemmology: J.J. Snow, 301-306.

Opal references and abstracts - Part II: R.A. Ball, N. Clayton, 307-310.

### **Volume 13, Number 10, May 1979**

Why sapphires from Sri Lanka differ from those from Australia: A.F. Wilson, 315-317.

Designed to detect Djevalite: Retail Jeweller, 317-318.

Amethyst – Natural or not?: R.A. Powell, 321-323.

The hazards of gemmology: G. Brown, 325-329.

Production of zirconia and other synthetic gem materials by the 'skull' melting technique: I.A. Mumme, 333-334.

Opal references and abstracts - Part II (continued): R.A. Ball, N. Clayton, 334-336.

### **Volume 13, Number 11, August 1979**

Diamond – True or false?: G. Brown, 341-351, 354-358.

Organic gem materials – What to look for: G. Brown, D. Lund, 352-353.

Treated Brazilian opal: G. Brown, J. Snow, 359-361.

Opals from the air: Uniken, 362.

Opal references and abstracts - Part II (continued): R.A. Ball, N. Clayton, 363-366.

### **Volume 13, Number 12, November 1979**

Natural and radiation induced colouration of smoky quartz: R. Powell, 373-378.

Sapphire and silk: R.A. Ball. I.A. Mumme, 379-381

Suggestions for nomenclature of opals: J.D. Altmann, 383-385.  
Synthetic opal for natural opal!: R.A. Ball, 386.  
A note on the serpentine in Lucknow, NSW: R. Powell, 387.  
An unusual agate: R.A. Ball, 390.  
Corallium precious corals: G. Brown, 391-400.

LED refractometer light sources: J. Snow, G. Brown, 255-257.  
 Facetable prehnite: R. Beattie, G. Brown, 258.  
 The Snow gemmological spectroscopy: G. Brown, 259-262.  
 Harts Range sunstone: G. Brown, H. Bracewell, 263-274.  
 Alexandrite-chrysoberyl from Zimbabwe: G. Brown, S.M.B. Kelly, 275-278.  
 Surface repaired rubies: R.W. Hughes, 279-280.  
 Two new thermal testers: G. Brown, J. Snow, 281-285.

**Volume 15, Number 9, February 1985**

Asterism: The great enigma: M. Connellan, L. Pozzibon, 295-306.  
 Recording gemstone absorption spectra: G. Brown, 308-309.  
 Black opal: A brief review: R.A. Ball, 310-314.  
 Synthetic or imitation: G. Brown, 319-321.  
 A red Hi-superbright LED refractometer light source: J. Snow, G. Brown, 322-324.

**Volume 15, Number 10, May 1985**

Properties of ornamental stones and their gemmological identification: E. Gubelin  
 1. The hardness scale, 337  
 2. Streak colours, 338  
 3. Absorption spectra, 342  
 4. Fluorescence colours, 344  
 5. The Becke Line test, 347  
 6. The identification tables arranged in colour groupings, 348  
 7. Cryptocrystalline quartz varieties, 382  
 8. Serpentine group properties, 386.

**Volume 15, Number 11, August 1985**

Asterism: A.R. Moon, M.R. Phillips, 395-399.  
 Abalone and its pearls: G. Brown, 400-403.  
 Amazonite from the Koppio District, South Australia: H. Bracewell, G. Brown, 404-408.  
 Bush amethyst: G. Pearson, 408-409.  
 Nakazumi synthetic star corundum: J. Snow, J. Sanders, G. Brown, 410-412.  
 Identifying Gilson's polycrystalline lapidary materials: G. Brown, 413-417.  
 Seiko synthetics: G. Brown, 418-420.

Australian ideal design: Comments by G. & M. Vargas, 421-424.

**Volume 15, Number 12, November 1985**

Role of water in cracking of opal: G. Pearson, 435-445.  
 Jade: G. Tombs, 445-447.  
 Some information on the Kashmir sapphire: G. Brown, D. Hamid, S.M.B. Kelly, 448-449.  
 Angles: E.T. Steller, 450-453.  
 Green dyed 'crackled' beryl: G. Brown, J. Snow, 454-455.  
 Conversion kits for in-built LED refractometer light sources: G. Brown, 456-458.  
 The RELite refractometer light source: G. Brown, J. Snow, 458-459.  
 Nummite: O. Dragsted, 461.  
 Methods for the distinction of natural and synthetic amethysts: Th. Lind, K. Schmetzer, H. Bank, 462-470.

**Volume 16 February 1986 - November 1988****Volume 16, Number 1, February 1986**

On the origin of blue sapphire from Elahera, Sri Lanka: G. Heilmann, U. Henn, 2-4.  
 Bowesite: A new lapidary material from Australia: S.M.B. Kelly, 5-8.  
 The Gemluta GL 500P reflectometer: G. Brown, J. Snow, B. Taylor, 9-10.  
 The hardness of Australian diamonds: C.R. Baker, 11-12.  
 Report on 20th I.G.C., Sydney, 12-13.  
 Presidium DiaMeter: G. Brown, 17.  
 Facetable bowenite: R. Beattie, G. Brown, 25-27.

**Volume 16, Number 2, May 1986**

The Proceedings of the 20th IGC, Sydney - Part 1  
 Gem minerals from the Embilipitiya and Kataragama areas in Sri Lanka: P.C. Zwaan, 35-40.  
 Examination of surface features of Argyle diamonds from Western Australia: G.A. Tombs, B. Sechos, 41-44.  
 Opal from Mexico: E. Gubelin, 45-51.  
 Review of the geology of the gemstones of Sri Lanka: M.B. Katz, 52-56.  
 Minerals and gemstones of Pakistan: C. Kovak, 57-59.  
 Gemstones in China – Especially jade and similar stones: A. Chikayama, 60-63.  
 Quantitative cathodoluminescence of gemstones: J. Ponahjo, T. Koroschetz, 64-71.  
 Observation and differentiation of natural and synthetic quartz using laser tomography: K. Sato, 72-80.  
 Abstracts - Part 1, 80-83.

**Volume 16, Number 3, August 1986**

The Proceedings of the 20th IGC, Sydney - Part 2

Study of scapolite, corundum and spinel crystals from the Tissamaharama Area, Sri Lanka: R. Vochten, E. De Grave, P.C. Zwaan, 91-94.

Production techniques of commercially available gem rubies: K. Schmetzer, 95-100.

Gemstones of the Beechworth area: W.D. Birch, 101-106.

Modes of occurrence of emeralds in Australia: I.A. Mumme, 106-108.

Limitations to the spectroscopic identification of a treated diamond: L.A. Schiffman, 108-109.

Gem deposits in Sri Lanka - Recent discoveries: E.G.G. Zoysa, 110-114.

Blue-green apatite from Gravelotte, South Africa: G. Remaut, R. Vochten, 115-116.

Abstracts - Part 2, 116-121, 128-129.

Inclusions in Australian sapphire before and after heat treatment: T.S. Coldham, 122-125.

Colour zoning in natural and synthetic materials: A. Ghera, G. Graziani, S. Lucchesi, M. Martini, 125-127.

**Volume 16, Number 4, November 1986**

An unusual Keshi pearl: G. Brown, 139-140.

Hollandite in quartz: J.I. Koivula, C.W. Fryer, 141-142.

Opal pineapples from White Cliffs: G. Pearson, 143-150.

Boulder opal triplet: R. Brightman, D. Sandeman, 151-152.

The gemmology of the shell cameo: G. Brown, 153-161.

Inclusions in sapphire and heat treatment: A.R. Moon, M.R. Phillips, 163-166.

**Volume 16, Number 5, February 1987**

Some more on crystal opal: B. O'Leary, 175-177.

Ivorina: A new ivory imitation: G. Brown, 178-180.

Decorative serpentinite from the Marble Bar area: E.R. Segnit, 182-183.

Fluorite and its inclusions: E.J. Gubelin, J.I. Koivula, 184-187.

Structural aspects of fingerprint inclusions in corundum: Tay Thye Sun, 188-190.

Inclusion related iron theft in amethyst: J.I. Koivula, 191-192.

Production techniques - Knischka synthetic rubies: K. Schmetzer, 192-194.

Miscellany: jet; plastic imitation Biwas; Australian colour-changing sapphire; Orissa garnet; Australian synthetic opal: G. Brown, J. Snow, S.M.B. Kelly, 195-198.

**Volume 16, Number 6, May 1987**

Presidential address to conference: G.A. Tombs, 211-212.

A system for the evaluation of opal: Capt. S.O. Haugen, 213-216.

Inclusions in yellow chrysoberyl, natural and synthetic alexandrite: U. Henn, 217-220.

The origin of sapphire in northeastern NSW: S.R. Pecover, 221.

The structure of sedimentary opal: Editor, 222.

Notes on Tasmanian gemstones: C. Thrower, D. Steane, 223-224.

Pink and violet sapphires from Nepal: L. Kiefert, K. Schmetzer, 225-230.

Citron chrysoprase: G. Brown, H. Bracewell, 231-233.

A new synthetic emerald: S.M.B. Kelly, G. Brown, 237-238.

New gems from Ratnapura, Sri Lanka: E. G. Zovsa, 239-241.

Resin bonded malachite: R. Brightman, M-L. Willheim, 239-240.

**Volume 16, Number 7, August 1987**

A new 'spot reading' technique for the refractometer: G.S. Walker, 253-256.

Pronounced flow structure in an Australian opal: J.I. Koivula, 257-258.

The plastic coating of gemstones: R.W. Hughes, 259-261.

A copal resin necklace: G. Brown, S.M.B. Kelly, 263-266.

Gemmological jottings: turquoise, scrimshaw, synthetic jelly opal, imitation gold coral; diamond probe: G. Brown, J. Snow, 267-270.

Goethite inclusion alteration: A test for 'fired' citrine quartz: J.I. Koivula, 271-272.

Colour grading coloured stones: F.A. Rundle, 272-279.

**Volume 16, Number 8, November 1987**

Review of jade in South Australia: J.G. Olliver, 283-28286

Gemmology study club lab reports: G. Brown, J. Snow, 287-292.

LWUV fluorescence of gemstones: J. Snow, G. Snow, 296-300.

Pyrite in Canadian ammonite: J.I. Koivula, 304-307.

A new treatment for turquoise: G. Brown, J. Snow, J. Lamb, 307-309.

Sapphires: Geological Survey of NSW, 309.

**Volume 16, Number 9, February 1988**

Argyle champagne diamonds: G. Brown, 319-322.

Precious opal at Coober Pedy: R.S. Robertson, D.C. Scott, 323-327.

Diagnostic properties of the latest synthetic stones: E. Gubelin, 329-341, 344-345.

Sri Lankan ekanite: J. Snow, G. Brown, 346-348.

Manganoan sugilite: G. Wigmore, 351.

**Volume 16, Number 10, May 1988**

Presidential address: G.A. Tombs, 359

A coconut pearl?: G. Brown, S.M.B. Kelly, J. Snow, 361-362.  
 Origin of cat's-eye effect in heat-treated zircons: H.A. Hann?, M. Weibel, 363-366.  
 Paua shell: G. Brown, 367-370.  
 Hematite imitation: G. Brown, J. Snow, 371-373.  
 Numerical approach to gem identification: H.S. Pienaar, 374-378.  
 A jade miscellany: G. Brown, J. Snow, 381-385.

#### **Volume 16, Number 11, August 1988**

Identification of ruby by E.S.R.: D.R. Hutton, G.J. Troup, 399-340.  
 New Zealand Aurora shell: G. Brown, A.J. McCabe, 401-407.  
 The A.E. Alexander Gavel: H. Bracewell, 407-408.  
 Is it amber?: J. Snow, G. Brown, 409-416.  
 Heat treatment of ruby: S.J.A. Currie, 417-418.  
 Verneuil sapphire with induced fractures: G. Brown, 419-421.  
 The EW-120SG electronic densimeter: G. Brown, J. Snow, 422-423.  
 Study Club lab reports; G. Brown, J. Snow, 424-429.

#### **Volume 16, Number 12, November 1988**

The Diamond Selector II: G. Brown, J. Snow, 440-442.  
 The Pool emerald: G. Brown, J. Snow, 443-449.  
 Bamboo coral: G. Brown, 449-454.  
 Gem Tourmaline on Kangaroo Island: J.L. Keeling, I.J. Townsend, 455-458.  
 Gems around Australia: H. Bracewell, 459-463.  
 Gemmology study club lab reports; G. Brown, J. Snow, 464-470.  
 The gemstones of Pakistan: R.J. Thompson, 471-472.  
 Gold coral re-evaluated: G. Brown, 473-477.  
 Specular heat-treated garnet: D. Friedman, 477.  
 The Pool emerald; W. Hicks, 478-479.

#### **Volume 17 February 1989 - November 1991**

##### **Volume 17, Number 1, February 1989**

Optronix® gemmological instruments: J. Snow, G. Brown, 3-4.  
 The discovery of a new emerald occurrence in Brazil, Capoeirana: D. Schwarz, 4-5.  
 The mining of sapphires: T.J. Nunan, 7-12, 18-19.  
 Ancient millipedes: J.I. Koivula, 13-14.  
 Greenbushes spodumene-quartz: G. Brown, H. Bracewell, 14-17.  
 Black-dyed synthetic opal: G. Brown, P. Callaway, 24-26.  
 Gemmology study club lab reports: G. Brown, J. Snow, 27-33.

##### **Volume 17, Number 2, May 1989**

Colour of chrysoprase in the light of mineralogical studies: W. Heflik, B.

Kwiecinska, L. Natkaniec-Nowak, 43-46, 58-59.

Australian colour-changing sapphire: G. Brown, S.M.B. Kelly, 47-48.  
 Siliciophite: Australian cat's-eye opal: G. Brown, 48-51.  
 Gems of the Mud Tank carbonatites: G. Brown, H. Bracewell, J. Snow, 52-57.  
 Gems around Australia (Mt Isa), Part 2: H. Bracewell, 60-62, 64.  
 The Snow diamond light: G. Brown, 63.  
 Gemmology study club lab reports: G. Brown, J. Snow, H. Bracewell, 65-68, 70-71, 73-75.

##### **Volume 17, Number 3, August 1989**

Mourning jewellery: J.C. Birmingham, 82-84.  
 The characteristics of Burmese spinel: U. Tin Hlaing, 84-87.  
 Some observations on Helenite: G. Brown, J. Snow, 88-90.  
 Synthetic periclase: S.M.B. Kelly, G. Brown, 90-92.  
 A gemmological study of 'Opalite' and 'Opal Essence': J.I. Koivula, R.C. Kammerling, 93-98.  
 Dayboro variscite: G. Brown, 98-100.  
 Yundamindera 'fire' opal: G. Brown, H. Bracewell, 101-103.  
 Russian hydrothermally-grown emerald: G. Brown, S.M.B. Kelly, J. Snow, 103-106.  
 An evaluation of 'Gemdata' identification program: G. McCaughtrie, & Comments, P. Read, 107-109.

##### **Volume 17, Number 4, November 1989**

Jack Snow Memorial Issue  
 Jack Snow – The practical man: G. Tombs, 115.  
 Introduction to the Memorial issue: G. Brown, 117.  
 Using the spectroscope: S.M.B. Kelly, 118-119.  
 Economical microscopes for gemmologists: T. Linton, G. Brown, 120-121, 156-158.  
 The use of the Figure-O-Scope in gemmology (Reprint): J.J. Snow, 122-126.  
 Wave Hill prehnite: H. Bracewell, 127-129.  
 Some thoughts on snuff-bottles: R.K. Mitchell, 129-131.  
 Inamori stones rough: J. Snow, G. Brown, 132-136.  
 Visual optics: A. Hodgkinson, 137-138.  
 Artistry through the microscope: J.I. Koivula, 139-141.  
 The use of isotopes in exploration for gemstones: A.F. Wilson, 142-146, 166.  
 Some rare gemstones: M. O'Donoghue, 147.  
 An investigation of three imitation opalized shells: J.I. Koivula, R.C. Kammerling, 148-152.  
 A synthetic by any other name: P. Read, 153-156.

Talkin' bout gem-testing instruments: R. Hughes, 159-164.

#### **Volume 17, Number 5, February 1990**

New aspects of the emerald workings in Colombia: D. Schwarz, 168-170.  
A dark-field illuminator for gemmological microscopes: T. Linton, G. Brown, 171-172.  
A preliminary assessment of the gem identification system software: G. McCaughtrie, 172-173.  
An interesting cultured blister pearl: R.C. Kammerling, J.I. Koivula, R.E. Kane, 174-175.  
A Kenyan gem feldspar: C.R. Bridges, G. Graziani, E. Gubelin, 177-183.  
The Western Australian pearling industry: F.J. Malone, D.A. Hancock, B. Jeffriess, 184-192.  
The XXII International Gemmological Conference: E.R. Segnit, 193-195.  
Knischka-created rubies: G. Brown, S.M.B. Kelly, 199-204.  
Mtorolite: G. Phillips, G. Brown, 205-207.

#### **Volume 17, Number 6, May 1990**

Presidential address: G. Brown, 216-218.  
Biron® synthetic pink beryl: G. Brown, 219-221.  
Gemmology study club lab reports: G. Brown, 221-230.  
Mt. Philp aventurescent iolite: G. Brown, H. Bracewell, 231-234.  
Rare-earths: T. Troiani, 235-236.  
Burmese zircon: U. Tin Hlaing, 237-239.  
YAGG: G. Brown, J. Snow, R. Brightman, 239-242.  
Talkin' bout gem testing instruments Part II: R.W. Hughes, 242-246.

#### **Volume 17, Number 7, August 1990**

Some rare ivories: G. Brown, 256-262.  
Chicken-blood stone: An unusual gem material: J.F. Guo, F.Q. Wang, 262-265.  
Gems around Australia - Part III (Northern Territory): H. Bracewell, 265-269.  
An unusual aquamarine: J.I. Koivula, R.C. Kammerling, 270-272.  
Medo Hand® vacuum tweezers: T. Linton, 272-273.  
Treasure Chest gem tester: G. Brown, T. Linton, 274-275.  
Myanmar diamonds from north to south: U. Tin Hlaing, 278.  
Gemmology study club lab reports: G. Brown, S.M.B. Kelly, R. Beattie, H. Bracewell, 279-285.

#### **Volume 17, Number 8, November 1990**

Multiple chatoyancy in Australian sapphire: G. Pearson, 296-298.  
ESR spectrum of Australian synthetic Biron emerald: D.R. Hutton, G.J. Troup, 299-301.

Presidium® DiaMeter™ - System Berger: T. Linton, G. Brown, 301-303.  
Queensland chrysoprase: N.J. Krosch, 303-306.  
A rare Baler shell pearl: G. Brown, S.M.B. Kelly, 307-308.  
Snail shells in amber: J.I. Koivula, 309-310.  
Imitation chicken-blood stone: G. Brown, S.M.B. Kelly, C. Sutherland, P. Callaway, 311-313.  
Chrysoprase from Goias, Brazil: R.C. Kammerling, J.I. Koivula, 313-315.  
Russian flux-grown synthetic spinel: G. Brown, S.M.B. Kelly, R. Sneyd, 315-317.  
Presidium® Diamond MiniMate™: T. Linton, G. Brown, 318-320.  
Argyle diamonds: G.A. Tombs, 321-324.  
Gemmology study club lab reports: G. Brown, S.M.B. Kelly, R. Beattie, H. Bracewell, 325-332.

#### **Volume 17, Number 9, February 1991**

Verneuil synthetic red spinel: G. Brown, R. Beattie, J. Snow, 344-347.  
Gem deposits of South-Western Sri Lanka: T.G. Pemadasa, 347-349.  
Argyle champagne and cognac diamonds: G. Brown, J. Chapman, 350-351.  
A plastic-coated, sugar-treated opal: R.C. Kammerling, J.I. Koivula, 352-355.  
An inexpensive conversion unit: G. Brown, T. Linton, 355.  
Radioactivity of some minerals in the Mogok area: U. Tin Hlaing, Z. Aung, W. Htein, 356-359.  
The Gold-Meter®: T. Linton, G. Brown, 360-362.  
Gemmology study club lab reports: G. Brown, S.M.B. Kelly, R. Beattie, 363-367.  
Some Australian turquoise deposits: G. Brown, 369-373.  
Gems around Australia – Part IV: H. Bracewell, 377-379.  
Padparadscha: A. Hodgkinson, 378-380.  
An introductory note on the man-made Emeraldolite and Oulongolite: G. Brown, G. Tombs, 381-382.

#### **Volume 17, Number 10, May 1991**

Quality assessment: G. Brown (Presidential Address), 393-396.  
A new dark-field loupe: T. Linton, M. Polita, G. Brown, 396-398.  
Tasmanian gem corals: R.W. Grigg, G. Brown, 399-404.  
Tourmalines from Western Australia: B.J. Darby, 405-408.  
Lechleitner coated corundums: G. Brown, S.M.B. Kelly, 408-411.  
Gem garnets from Horse Gully, NSW: R.R. Coenraads, R. van der Graaf, 412-415.  
Gemmology study club lab reports: G. Brown, S.M.B. Kelly, H. Bracewell, 417-425.

A faded amethyst necklace: G. Brown, D. Hamid, 426-429.

Polaroid spectra system: T. Linton, G. Brown, 429-431.

### **Volume 17, Number 11, August 1991**

Review of a new theory on emerald formation: J.L. Keeling, 440-442.

A furnace for heat-treatment: R.N. Ediriweera, S.I. Perera, W. Weerasinghe, 443-445.

Comparisons between Kenyan, Australian and Sri Lankan sapphires: G. Tombs, 446-449.

Characterization of a so-called 'Reconstructed lapis lazuli': R.C. Kammerling, J.I. Koivula, E. Fritsch, 450-453.

Gems around Australia - Part 5 (WA): H. Bracewell, 454-456.

A new surface diffusion-treated sapphire: G. Brown, R. Beattie, 457-459.

Queensland sapphire: N.J. Krosch, W. Cooper, 460-464.

Coral identification kit: T. Linton, G. Brown, 465.

Synthetic red spinel: A. Hodgkinson, 466-468.

The Shibuya 150 refractometer: T. Linton, G. Brown, 468-469.

Gem quality almandine garnets from Antarctica: R. Brightman, 470-473.

Gemmology study club lab reports: G. Brown, S.M.B. Kelly, H. Bracewell, 475-478.

### **Volume 17, Number 12, November 1991**

Australian emeralds: D. Schwarz, 488-497, 501.

Plastic imitation opals from Thailand: R.C. Kammerling, J.I. Koivula, E. Fritsch, 498-501.

Gems around Australia - Part 6 (Broome): H. Bracewell, 502-503.

Hydrothermally synthesized agate-like crystals: M. Hosaka, 503-504.

Burma-type rubies from Vietnam: U. Henn, 505-509.

New Myanmar ruby deposit: U. Tin Hlaing, 509-510.

Queensland sapphire Part II: N.J. Krosch, W. Cooper, 511-515.

Lechleitner synthetics: K. Schmetzer, 516-523.

Gemmology study club lab reports: G. Brown, S.M.B. Kelly, H. Bracewell, 526-531.

## **NEW FORMAT**

### **Volume 18 February 1992 - November 1994**

#### **Volume 18, Number 1, February 1992**

Halogen lamps - A warning: Instrument Evaluation Committee, 2-4.

Trade embargo on coral: G. Brown, 5-6.

The Mintabie opal field: I.J. Townsend, 7-12.

An unusual alexandrite: U. Henn, H. Bank, 13-15.

Blue-green emerald from Nigeria: H.A. Hanni, 16-18.

Novel assembled opal from Mexico: R.C.

Kammerling, J.I. Koivula, 19-21.

Corundum veinlets in ruby: Sun Xian Ru, 22-23.

#### **Volume 18, Number 2, May 1992**

The care and cleaning of gem materials: M. Stather, 34-38.

Gems around Australia (WA): H. Bracewell, 38-39.

Robotic opal cutting: A. Cody, 40-41.

Greenstone from Myanmar: U. Tin Hlaing, 42.

Vietnamese ruby: Discrimination: G. Brown, 43-46.

Torrington emerald: G. Pearson, 47-49.

Material loss when sawing gem diamond: Y. Kerremans, E. Wanten, 49-51.

Fibre-eye: G. Brown, S.M.B. Kelly, 52-53.

Bead buyer's and parcel picker's filter set: T. Linton, G. Brown, 54-55.

Gem Study Club Report, 56-60.

#### **Volume 18, Number 3, August 1992**

Sapphires and rubies from volcanic provinces: R.R. Coenraads, 70-78.

Myanmar jade: An update: U. Tin Hlaing, 79-80.

Spectroscopic study of Biron synthetic pink beryl: E. Fritsch, S. Muhlmeister, A. Birkner, 81-82.

Imitation lapis lazuli, charoite and azurite-malachite: D. Bennett, J.I. Keeling, 83-84.

Almandine garnet from Antarctica: J.I. Keeling, R.B. Flint, 85-88.

Magnetic resonance spectrum of Torrington emerald: D.R. Hutton, G.J. Troup, 89-90.

#### **Volume 18, Number 4, November 1992**

The Australian sapphire industry: T.S. Coldham, 104-107.

Ruby fakes: G. Brown, R. Beattie, 108-114.

Scapolite from Sinjiang Region, west China: Zhang Peili, 115-117.

The carat: R. Hannaford, 117-118.

Hofer Gemstone Colorcard: T. Linton, G. Brown, 122-124.

Rhodochrosite from Argentina: J.A. Saadi, J.C. Grasso, 125-132.

#### **Volume 18, Number 5, February 1993**

Uvarovite from Outokumpu, Finland: U. Henn. H. Bank, 142-144.

Determination of the weight of a set stone by hydrostatic weighing: R.K. Mitchell, 143-144.

Historical note on the colour phenomenon in precious opal: D.B. Hoover, 145-148.

Hydrothermal ruby from Novosibirsk: H.A. Peretti, C.P. Smith, 149-157.

Mong Hsu ruby update: U. Tin Hlaing, 157-160.

Composite imitation of crystal opal: R.C. Kammerling, J.I. Koivula, 162-164.

Shan states sapphires: U. Tin Hlaing, 164.

Gem Study Club Report, 169-173.

### **Volume 18, Number 6, May 1993**

- Fluorescence excitation-emission of Cr-containing gems: D.B. Hoover, A.F. Theisen, 182-187.  
Communicating colour: G. Brown, 187-190.  
An important peridot: G. Webb, 191-193.  
Gems around Australia: H. Bracewell, 193-194.  
Leopardwood mosaic opal: M. Sawicki, G. Brown, 195-196.  
Rhodonite from Upper Coomera, SE Queensland: G. Brown, H. Bracewell, 197-199.  
Gem test lamp LI 103: G. Brown, 200.  
An intriguing black necklace: G. Brown, S.M.B. Kelly, 200-202.

### **Volume 18, Number 7, August 1993**

- Cultured pearl grading: A.J. Clark, 214-215.  
Maxixe-type beryls: G. Brown, 215-221.  
Unusual twinning in natural and synthetic amethyst: U. Henn, 222-224.  
Opalised fossil: Australian Museum, 223-224.  
Zeiss stereomicroscope: T. Linton, R. Beattie, G. Brown, 225-226.  
Colour treatment of common beryls: D. Robert, 231-234.  
Advanced refractometer techniques: A. Hodgkinson, 231-234, 237.  
Two 'double star' sapphires: J.I. Koivula, R.C. Kammerling, E. Fritsch, 235-236.  
Gems around Australia: H. Bracewell, 239-242.

### **Volume 18, Number 8, November 1993**

- Memorial W.H. Hicks, 246.  
Gem illuminated immersion cell: T. Linton, R. Beattie, G. Brown, 247-248.  
A.G.L. portable Gem Testing Kit: T. Linton, R. Beattie, G. Brown, 249, 256.  
XXIV IGC – France: G. Brown, 250-251.  
Some far northern opal diggings in South Australia: G. Brown, J. Townsend, K. Endor, 252-255.  
SEM studies of bleached and polymer-impregnated jadeite: T.S. Tay, S. Paul, C.M. Puah, 257-261.  
Australian synthetic periclase: G. Brown, 265-269.  
Gem Study Club Report, 271.

### **Volume 18, Number 9, February 1994**

- Introducing ESR/EPR spectroscopy to gemmology: D.R. Hutton, G.J. Troup, 278-279.  
Presidium Diamond Fact™: T. Linton, R. Beattie, G. Brown, 279-281.  
The pearl industry in Queensland and Torres Strait: T. Ward, 282-284.  
A garnet location at Mt. Wyangapinny, near Pittsworth, on the Darling Downs: D.N. Cracknell, 285-286.

- Alluvial diamond deposits of the Guaniamo region, Bolivar State, Venezuela: R.R. Coenraads, G. Webb, B. Sechos, 287-294.  
Notes from the Museum: G. Webb, 294-295.  
Pleochroic colours and their related rays: A. Hodgkinson, 295-297.  
Australian Mabe pearls: G. Brown, H. Mendis, 298.

### **Volume 18, Number 10, May 1994**

- Bill Hicks Memorial Issue – Part 1: In appreciation, 310.  
The name game: R.W. Hughes, 311-315.  
A combined magnetic resonance and gamma-irradiation study of some green beryls: D.R. Hutton, G.J. Troup, 315-317.  
Torrington emerald update: K. Schmetzer, 318-319.  
Visual Optics - The Hodgkinson method: An update: A. Hodgkinson, 320-322.  
1994 Burma Emporium: R.E. Kane, 322-323.  
Microsurfaces: A photoessay dedicated to Bill Hicks: J.I. Koivula, 323-325.  
Notes on alexandrite chrysoberyl: S.J.A. Currie, 326-328.  
Miniature fibre optics: T. Linton, 329-331.  
Computer assisted gem identification: P. Read, 332-333.

### **Volume 18, Number 11, August 1994**

- Bill Hicks Memorial Issue - Part 2  
The origin, formation and emplacement of diamonds: M. Stather, 342-345.  
Heat treated corundums of Sri Lanka: T.G. Pemadasa, M.V. Danapala, 346-347.  
Radiolucency of diamond and its simulants: R. Coates, 348-351.  
Hsa-Taw green tourmaline: U. Tin Hlaing, 352-353  
ROS/GEM Optics™ Model RFA 322 refractometer: A. Shields, B. Neville, 354-355.  
Almandine garnets from Vietnam: R.C. Kammerling, J.I. Koivula, 356-358.  
Brief report on Indonesian opal: C. Lambert, G. Brown, 359-361.  
A new type of synthetic ruby from Russia: U. Henn, 362-364.

### **Volume 18, Number 12, November 1994**

- Opal – Australia's national gemstone: A. Bartram, 374-376.  
1994 Presidential Address: C. Stott, 377.  
1994 Patron's Address: G. Tombs, 378.  
Fracture filled diamonds: B. Secho, 379-385.  
Gemlite™ polariscopes: T. Linton, B. Neville, A. Shields, 386-387.  
Tahiti cultured pearl: M. Coeroli, 388-394.

## **Volume 19 January-March 1995 – October-December 1997**

### **Volume 19, Number 1, January-March 1995**

- A brief account of Myanmar's pearl culture industry: Tint Tun, 2-4.  
The Raman microprobe: A new gemmological tool: B. Lasnier, 5-7.  
Jemeter™ Digital 90: T. Linton, A. Shields, B. Neville, 8-10.  
How to fossick in Queensland – A guide to new fossicking legislation: B. Neville, 11-14.  
An examination of Swarovski™ – A new imitation emerald from Austria: E. Fritsch, R.C. Kammerling, J.I. Koivula, 15-18.  
A new variety of grossular garnet with extended gemmological constants: R. Brightman, J. Tunzi, 19-22.  
Gems around Australia – Part 10 (Marra Mamba tiger eye, WA): H. Bracewell, 23-24.  
Alexandrite chrysoberyl surprises: A. Hodgkinson, 25-28.  
Nicholas created alexandrite™: G. Brown, S.M.B. Kelly, 29-30.  
The cathodoluminescence of synthetic periclase: J. Ponahlo, 31-37.

### **Volume 19, Number 2, April-June 1995**

- New extension of Mong Hsu ruby deposit: U Tin Hlaing, 51.  
A brief history of heat: R.W. Hughes, 52-54.  
Heat treating sapphires from the Anakie District, Australia: T. Themelis, 55-60.  
Gemmological miscellany, 61-64.  
Hanneman-Hodgkinson synthetic emerald filter®: T. Linton, A. Shields, 65-68.  
Visual characteristics of heat-treated corundum: B. Sechos, 69-72.

### **Volume 19, Number 3, July-September 1995**

- 50th Jubilee issue  
This issue contained the following papers of historical interest with respect to The Gemmological Association of Australia.  
Introduction  
History of the GAA: G.A. Tombs  
History of the GAA (NSW Division): G.A. Tombs  
Gemstones of New South Wales: R.R. Coenraads  
History of the GAA (Victorian Division): W.E. Funston  
Gemstones of Victoria: T. Troiani  
History of the GAA (Queensland Division): D.G. Sanderson  
Gemstones of Queensland: A.F. Wilson  
History of the GAA (SA Division): A. Hill  
Gemstones of South Australia: I.J. Townsend  
History of the GAA (WA Division): B. Taylor, F. Parker  
Gemstones of Western Australia: F. Parker

- History of the GAA (Tasmanian Division): T.C. Roper, P. Walker  
Gemstones of Tasmania: B. Sweeney  
Pearls of Australia: D. O'Sullivan, D. Cropp, O. Bunter  
History of The Australian Gemmologist: G. Brown  
Epilogue

### **Volume 19, Number 4, October-December 1995**

- Gems and gemmology in Sri Lanka: The early history: M.M.M. Mahroof, 169-174.  
Amethysts and their occurrences: H. Bank, C.C. Milisenda, 175-177.  
Notes from a Singaporean laboratory: Tay Thye Sun, 178-181.  
Gems around Australia – Part 11 (Wylloo amethyst, WA): H. Bracewell, 182-184.  
The hazardous effects of refractometer contact fluid – A note: T. Linton, 185.  
A history of Pietre Dure: T. Troiani, 186-189.  
An examination of peridot from Ethiopia: R.C. Kammerling, J.I. Koivula, 190-194.

### **Volume 19, Number 5, January-March 1996**

- Shape, structure and colours of Polynesian pearls: J.-P. Cuif, Y. Dauphin, C. Stoppa, S. Beeck, 205-209.  
Warriorite A new black tourmaline gemstone from Western Australia: J.G. Olliver, M. Thompson, 210-214.  
Agate Creek agate: P. Howard, 215-220.  
Australian (1.81) refractometer fluid: T. Linton, B. Neville, 221-223.  
1994 gemstone production in the Northern Territory: NT Department of Mines & Energy, 224-225.  
Dyed opalised sandstone and conglomerate – A new gem product from Andamooka: J.L. Keeling, I.J. Townsend, 226-231.  
Review of diamond resources in South Australia: I.J. Townsend, B.J. Morris, M.G. Farrand, 233-236.

### **Volume 19, Number 6, April-June 1996**

- The status of pearl culture in Indonesia: T. Winanto, K. Mintardjo, 245-249.  
The Baily light source: T. Linton, R. Beattie, G. Brown, 250-251.  
Gems around Australia - Part 12 (Yinnietharra & Mt. Phillip, WA): H. Bracewell, 252-254.  
An examination of colour-change sapphires from Tanzania: R.C. Kammerling, M.L. Johnson, Y. Liu, 255-258.  
Gemmological miscellany: G. Brown, 259-263.  
Interesting gems from north-east Tasmania: B. Sweeney, 264-267.  
Mong Hsuk rhodolite garnet: U Tin Hlaing, Tin Tin Win, 270-272.  
Notes from the Museum: G. Webb, 273-274.

**Volume 19, Number 7, July-September 1996**

- Electrum in Antiquity: Why was one word used for two substances?: J. Saul, 285-287.
- Zoning in Sri Lankan zircons: Chemically controlled?: M.S. Rupasinghe, A. Senaratne, 288-291.
- Measurement of refractive index by the apparent depth method: D. Bennett, 292-294.
- The true story of White Cliffs: G. Rowe, 295-300.
- Lab notes: B. Sechos, G. Brown, 301-302.
- Ethiopia: A new source for precious opal: D.B. Hoover, T.Z. Yohannes, D.S. Collins, 303-307.
- Scanning electron microscope studies on bleaching of jadeite: T.S. Tay, S.P. Liew, C.M. Pua, 310-314.

**Volume 19, Number 8, October-December 1996**

- Combarbalita: An ornamental kaolinite from Combarbalá, Chile: R.R. Coenraads, 325-334.
- The Empress Pearl® - A New Zealand cultured half-pearl: L. McKenzie, 336-338.
- The typical gemmological characteristics of Argyle diamonds: J. Chapman, G. Brown, B. Sechos, 339-346.
- Polaroid Macro 5 SLR camera: T. Linton, S. Sultman, 347-350.
- Crystal carving and other esoteric things: F.H. Thrupp, 351-352.
- Northern Territory's new fossicking legislation: T. Roberts, 353-354.

**Volume 19, Number 9, January-March 1997**

- EPR/ESR spectra of natural and synthetic opals – A Pilot Study: D.R. Hutton, G.J. Troup, M. Young, 365-367.
- Tasmania and Antarctica: A long association: P.G. Quilty, 368-374.
- Abalone pearls from Brass Strait: D. Cropp, 375-379.
- An occurrence of gem quality diopside, Yinnietharra Station, Western Australia: F. Doedens, 380-382.
- Identifying characteristics of hydrothermal synthetics: B. Sechos, 383-388.
- Fossicking in Queensland: Queensland Department of Mines & Energy, 389-392.

**Volume 19, Number 10, April-June 1997**

- The pearl fisheries of Sri Lanka – Some chapters from a forgotten history: M.M.M. Mahroof, 405-412.
- Fibre torches: B. Neville, 413-414.
- Argyle diamonds' Pink Diamond Tenders (1985 - 1996): Polished Sales Division, Argyle Diamonds, 415-418.
- Yttrium Aluminium Perovskite: T. Linton, 419-420.

The Merlin Prospect – Australia's next commercial diamond mine?: Ashton Mining Limited, 421.

The red pearls of Pinna Nobilis: J.-P. Gauthier, J. Caseiro, B. Lasnier, 422-426.

New emerald deposits from southern India: J. Panjikar, K. T. Ramchandran, K. Balu, 427-432.

**Volume 19, Number 11, July-August 1997**

- The diamond deposits of Myanmar: U Tin Hlaing, Tin Tin Win, 445-447.
- The gem kit: T. Linton, S. Sultman, J. Peters, 448-451.
- Origin and deformation of agate-bearing sphelurites: The Thuringian Forest, Germany: G. Holzhey, 452-459.
- Alexandrite chrysoberyl from Dowerin, Western Australia: Revisited: A. Bevan, P. Downes, 460-463.
- Inclusions in agates and chalcedonies: P. Howard, 464-465.
- Gems around Australia – Part 13 (Mooka Station, WA): H. Bracewell, 467-470.
- Gemmological features of rubies and sapphires from the Barrington Volcano, Eastern Australia: G. Webb, 471-475.

**Volume 19, Number 12, October-December 1997**

- A new era for opal nomenclature: A. Smallwood, 486-496.
- Pearls and pearl oysters in the Gulf of California, Mexico: D. McLaurin, E. Arizmendi, S. Farrell, M. Nava, 497-501.
- A miscellany of organics: G. Brown, 503-506.
- Corundum (ruby) from the Karen State, Myanmar: A note: U Tin Hlaing, 507-508.
- A new technique for detecting synthetic yellow sapphire: T. Linton, 509-511.
- Meiji Technico model GF-252 refractometer-polariscope: T. Linton, S. Sultman, G. Peters, 513-515.

**Volume 20 January-March 1998 – October-December 2000****Volume 20, Number 1, January-March 1998**

- Pearl identification: S.J. Kennedy, 2-19.
- The Hodgkinson method, a.k.a. The eye and prism method: Some further adaptations: D.B. Hoover, 20-33.
- The 26th International Gemmological Conference: G. Brown, G. Tombs, 36-40.

**Volume 20, Number 2, April-June 1998**

- An occurrence of microcrystalline opal, Nipple Mountain, Kelowna, British Columbia, Canada: R.R. Coenraads, R.E. Pogson, 58-61.
- Portable dark-fields: B. Bretherton, 62-63.

Emerald chemistry from different deposits: An electron microscopy study: I.I. Moroz, I.Z. Eliezri, 64-69.

Foreign affairs: Fracture healing/filling of Möng Hsu ruby: R.W. Hughes, O. Galibert, 70-74.

New occurrence of demantoid in Namibia: Th. Lind, U. Henn, H. Bank, 75-79.

Rare gem minerals from Brazil. Part 1: Euclase and phenakite: M.L.S.C. Chaves, J. Karfunkel, D.B. Hoover, 80-86.

#### **Volume 20, Number 3, July-September 1998**

Touring the diamond factories of Amsterdam: A. Barnard, 98-101.

The Hodgkinson method, a.k.a. The eye and prism method: Clarifying the records: W. Wm. Hanneman, 102-104; Reply: D.B. Hoover, 104-105.

Amazonite in Sri Lankan topaz identified by Raman analysis: J.I. Koivula, S. Elen, 106-107.

Gems around Australia – Part 14 (emerald, Poona, WA): H. Bracewell, 108-111.

An Australian synthetic opal: G. Brown, 112-113.

On the identification of amber and its imitations using Raman spectroscopy: T.S. Tay, Z.X. Shen, S.L. Yee, 114-123.

Treated blue diamond: B. Sechos, 124.

Cat's-eye black opal: M.S. White, 126.

#### **Volume 20, Number 4, October-December 1998**

Has science overthrown the king of gems?: A. Barnard, 138-140.

The Idar-Oberstein gemstone industry's 500th anniversary: H. Bank, 141-144.

Expanded scale Eickhorst refractometer: T. Linton, S. Sultman, J. Peters, 145-148.

Alaskan jade: P. Howard, 149-153.

Scottish Gem Lab news: A. Hodgkinson, 154-158.

Alexandrite, emerald, ruby, sapphire and topaz in as biotite phlogopite fels from Poona, Cue District, Western Australia: G. Grundmann, G. Morteani, 159-167.

#### **Volume 20, Number 5, January-March 1999**

Australian Chinese writing stone: A. Bevan, P. Downes, J. Bevan, 178-181.

Gemscan II: T. Linton, R. Pemberton, A. Cumming, B. Sweeney, N. Masson, 182-185.

How to make an appraisal of jadeite: C.M. Ou Yang, 188-192.

A miscellany of organics: Part 2: G. Brown, 193-197.

New opal carving factory at Khao Yai, Thailand: R.R. Coenraads, P.E. Elmer, 198-201.

Origin of sapphires from the Jizerská Louka alluvial deposit in north Bohemia, Czech Republic: P. Malíková, 202-206.

#### **Volume 20, Number 6, April-June 1999**

Geozoological prospecting for gold and gems: D.M. Colchester, 218-221.

Gemmological miscellany: G. Brown, 223-226.

Refractometers and the pin-hole disc: T. Linton, 227-229.

White Cliffs: Australia's first commercial opal field: G. Rowe, 230-231.

Evaluation of a teaching aid for 'Visual optics': T. Linton, 232-235.

L<sub>H</sub> - an "old" Gemmological Property: W. Wm. Hanneman, 236-238.

Pearls and pearl oysters in the Gulf of California, México: D. McLaurin, E. Arizmendi, S. Farell, M. Nava, 239-245.

Gemstones in a new light: A. Hodgkinson, 246-249.

Burmite – Burmese amber: U Tin Hlaing, 250-253.

#### **Volume 20, Number 7, July-September 1999**

Characterisation of recent and fossil ivory: V. Rolandi, 266-276.

The nomenclature of gemstones with special reference to the garnet and tourmaline mineral groups: E.L. Stevens, 277-279.

Ruby and variously coloured sapphires from Ilakaka, Madagascar: K. Schmetzer, 282-284.

The effect of the gamma-irradiation dose combined with heat on the colour enhancement of colourless quartz: M.V.B. Pinheiro, F.S. Lameiras, K. Krambrock, J. Karfunkel, J.B. da Silva, 285-288.

Möng Hsu ruby revisited: U Tin Hlaing, 289-292.

Ekati – Canada's first commercial diamond mine: An editorial review, 293-297.

Tester Model 590 for colourless moissanite/diamond: V.M.F. Hammer, J. Stefan, 298-301.

#### **Volume 20, Number 8, October-December 1999**

The visible absorption spectroscopy of emeralds from different deposits: I.I. Moroz, M.L. Roth, V.B. Deich, 315-320.

Brothers corundum: sapphires in Sri Lanka: M.M.M. Mahroof, 321-325.

Ruby from Tunduru-Songea, East Africa – Some basic observations: G. Hamid, S.M.B. Kelly, G. Brown, 326-330.

A personal critique of 'Modeling the appearance of the round brilliant cut diamond: Analysis of brilliance' in *Gems & Gemology*: G. Holloway, 331-335, 338-339.

Chatoyant tremolite (nephrite): G.A. Tombs, 340-341.

Verneuil synthetic corundums with induced 'fingerprints': J. Free, I. Free, G. Brown, T. Linton, 342-347.

Our past history: Statement respecting the opal industry at White Cliffs: T.C. Wollaston, 347-348.

#### **Volume 20, Number 9, January-March 2000**

- A preliminary investigation of precious opal by laser Raman spectroscopy: A. Smallwood, 363-366.
- Diamond Proover II: T. Linton, A. Cumming, K. Hunter, 367-369.
- In defence of gemmologists – A different view on nomenclature: W. Wm. Hanneman, 370-373.
- A warning – Beware of 1.815 refractometer contact fluid: T. Linton, 373.
- Crown angle estimation for diamond using a 'tilt test': G. Holloway, 374-375.
- Gems around Australia – Part 15 (south WA): H. Bracewell, 378-381.
- The Merlin diamond-mining project Part 1: An introduction, 382-385.
- D-limonene - a useful immersion liquid for gemmology: T. Linton, 386-387.
- A new deposit of smoky quartz crystals from the Torrington area: H. Bracewell, 388-390.
- Rare Australian gemstones – stichtite: R.S. Bottrill, G. Brown, 391-393.
- Report on 27<sup>th</sup> International Gemmological Conference: F.I. Sutherland, 394-395.

#### **Volume 20, Number 10, April-June 2000**

- The Slocan Valley sapphire deposit, Nelson, British Columbia, Canada: R.R. Coenraads, J.W. Laird, 410-415.
- Papers on opal previously published in The Australian Gemmologist: Editorial Management Committee, 416-420.
- Nelson M17 gemstone cooling unit: T. Linton, B. Bretherton, 421-424.
- Synthetic fersite – A new gemstone simulant: U. Henn, 426-427.
- What's new in gem testing instruments – The Brewster-angle meter: T. Linton, K. Hunter, A. Cumming, N. Masson, G. Pearson, 428-431.
- The Hanneman refractometer: T. Linton, K. Hunter, A. Cumming, 432-435.
- Caveat Emptor: F.H. Thrupp, 436.
- Where the Monsoon comes earlier – The story of a personal journey of discovery: U Tin Hlaing, 437-440.
- Gemmological miscellany: G. Brown, 441-444.

#### **Volume 20, Number 11, July-September 2000**

- Present Russian synthetic and enhanced gemstones: V.S. Balitsky, 458-466.
- Diffraction colours of opal: M. Ostrooumov, H.A. Talay, 467-472.
- New find of gem quality uvarovite in Tibet: He Xuemei, Cai Keqin, Gong Shan, 473-477.
- Surface reflectivity of synthetic moissanite: T. Linton, 478.
- Chistolite from Kyaukse, Myanmar: U Tin Hlaing, 479-480.

Unusual inclusions in quartz: J.I. Koivula, 481-482.

Presidium Moissanite Tester™: T. Linton, K. Hunter, 483-485.

Chinese pearls: Their culturing and trading: Guo Tao, 486-490.

#### **Volume 20, Number 12, October-December 2000**

- Dispersion measurement with the gemmologist's refractometer - Part 1: D.B. Hoover, T. Linton, 506-516.
- NovaDiamond® colour enhanced yellow and yellow-green diamonds: A.S. Barnard, 517-522.
- Rare Australian gemstones – Moonstone, A rare Queensland gemstone: H. Bracewell, 523-528.
- Russian colourless synthetic diamond, now available in the market: J.C.C. Yuan, 529-533.
- Australia's gemstone resources and their markets: G. Brown, 534-539.

#### **Volume 21 January-March 2001 – October-December 2003**

##### **Volume 21, Number 1, January-March 2001**

- Tourmaline and aquamarine deposits from Brazil: J. César-Mendes, H. Jort-Evangelista, R. Wegner, 3-6.
- Jade: Occurrence and metasomatic origin: G.E. Harlow, S.S. Sorensen, 7-11.
- Brazilian gem provinces: C.P. Pinto, A.C. Pedrosa-Soares, 12-16.
- Emerald deposits - A review: D. Schwarz, G. Giuliani, 17-23.
- Gem tourmaline chemistry and paragenesis: W.B. Simmons, K.L. Webber, A.U. Falster, J.W. Nizamoff, 24-29.
- Origin of gem corundums from basaltic fields: F.L. Sutherland, D. Schwarz, 30-33.
- The geology of Australian opal deposits: I.J. Townsend, 34-37.
- View point – Much ado about nothing: W. Wm. Hanneman, 38-40.

##### **Volume 21, Number 2, April-June 2001**

- Characterisation of a new Chinese hydrothermally grown emerald: C. Zhenqiang, Z. Jiliang, C. Keqin, Z. Changlong, Z. Weining, 62-66.
- Disclosure – Gemstones and synthetics – Does the jewellery industry care?: T.T. Sun, 67-75.
- The gemstone occurrences of Madagascar: U. Henn, C. Milisenda, 76-82.
- Scottish Gem Lab news: A. Hodgkinson, 83-87.
- Dispersion, birefringence, and the critical angle refractometer: W. Wm. Hanneman, 88-90.

Ornamental variety of pink marble with apatite found near Eppawala, Sri Lanka: M.D.P.L. Francis, P.G.R. Dharmaratne, 91-94.

#### **Volume 21, Number 3, July-September 2001**

Gemstones of Minas Gerais, Brazil: I.J. Townsend, 111-112.  
Exploration for diamonds in South Australia: K. Wills, 113-115.  
The making of synthetic rubies: J. Ward, 115-116.  
The gem emporium in Myanmar: U Tin Hlaing, 117-119.  
An overview of China's pearl industry: Hao Xie, Liping Li, 120-123.  
Notes from the Museum focusing on travertine: G. Webb, 124.  
Ti-Fe mineral inclusions in star sapphires from Thailand: S. Saminpanya, 125-128.  
Macro & micro anatase-rutile combinations in quartz: J.I. Koivula, M. Tannous, 129-131.

#### **Volume 21, Number 4, October-December 2001**

Dispersion measurement with the gemmologist's refractometer – Part 2: D.B. Hoover, T. Linton, 150-160.  
Brandt proportion loupe: T. Linton, A. Cumming, N. Masson, B. Sweeney, 161-164.  
Rare Australian ornamental materials – Zebra rock an ornamental stone from the East Kimberley, Western Australia: A.W.R. Bevan, 165-168.  
Staurolite from the Lai Hka and Mong Keng areas, Myanmar: U Tin Hlaing, 169-170.  
Identification of GE POL™ diamonds: E. Fritsch, J.-P. Chalain, H. Hänni, 172-177.

#### **Volume 21, Number 5, January-March 2002**

Five centuries of Mexican pearls: D. McLaurin Moreno, E.A. Castillo, 190-201.  
Star garnets from Ilakaka, Madagascar: K. Schmetzer, H.-J. Bernhardt, 202-206.  
The Springsure deposit of precious opal: R. Beattie, 207-210.  
Corundum/spinel reaction textures in carbonate-origin rocks, Sri Lanka – Preliminary observations: M.D.P.L. Francis, P.G.R. Dharmaratne, 211-214.  
Gemchecker™ professional valuation & appraisal module: T. Linton, K. Frazer, 215-218.  
XXVIII International Gemmological Conference: L. Sutherland, G. Brown, 219-220.

#### **Volume 21, Number 6, April-June 2002**

Mexican gem opals: E. Fritsch, M. Ostrooumov, B. Rondeau, A. Barreau, D. Albertini, A.-M. Marie, B. Lasnier, J. Wery, 230-233.  
The magnetic index: W.Wm. Hanneman, 234-235.

Spectroscopic properties of Möng Hsu ruby: S. Siripaisarnpipat, T. Pattharakorn, S. Pattharakorn, S. Sanguanruang, N. Koonsaeng, S. Achiwawanich, M. Promsurin, P. Hanmungthum, 236-241.  
Interesting American opals: Wood replacement: J.I. Koivula, M. Tannous, 242-243.  
Louisiana opal: G. Brown, 244-246.  
Gemmological study of corundum from Madagascar: J. Shida, 247-252.  
Recent observations on composite stones: U. Henn, 253-257.

#### **Volume 21, Number 7, July-September 2002**

Classification of natural opal Type 1: J. Schellnegger, 270-277.  
Some aspects of precious opal synthesis: S.V. Filin, A.I. Puzynin, V.N. Samoilov, 278-282.  
New imitation gemstones from Australia: G. Brown, T. Linton, 283-287.  
Orange sapphires or just lemons?: T. Coldham, 288-293.

#### **Volume 21, Number 8, October-December 2002**

Update of Australia's gemstone and pearl resources: G. Brown, 273-277.  
Colour in quartz: From atomic substitutions to nanoinclusions: P. Vasconcelos, B. Cohen, N. Calos, 278.  
The processing and heat treatment of Subera (Qld) sapphire rough: M. Maxwell, 279-286.  
Australian sedimentary opal – Why is Australia unique?: D. Horton, 287-294.  
The mystery about coloured diamonds: C. Carrington, 295-298.  
Agate Creek agates: P. Howard, 299-300.

#### **Volume 21, Number 9, January-March 2003**

Morphology of diamond crystals from the Bingara Range, Northern New South Wales, Australia: J.D. Hollis, 350-359.  
A compilation of infrared absorption spectra of some specific gemstones: S. Fernandes, M. Khan, G. Choudhary, 361-367.  
Genesis and gemmology of sapphires from the Nezametnoye deposit, Primorye Region, Russia: A. Khanchuk, B. Zalishchak, V. Pakhomova, E. Odarichenko, V. Sapin, 369-375.

#### **Volume 21, Number 10, April-June 2003**

Rare gem mineral deposits from Brazil - Part 2: Lazulite and scorzalite: M.L. de Sá C. Chaves, J. Karfunkell, A.H. Horn, D.B. Hoover, 390-399.  
Limitations of the pavilion depth - Rapid sight estimates method: G. Holloway, 400-403.  
Relationship between the Groove density of the grating structure and the strength of iridescence in mollusc shells: Y. Liu, K.N. Hurwit, L. Tian, 405-407.

An unusual crystal from the central Queensland sapphire fields: R. Beattie, 408.  
Gem quality petalite from Myanmar (Burma): U Kyaw Khaing Win, T. Themelis, 409.  
Large OPL™ diffraction grating spectroscope: T. Linton, A. Cumming, K. Hunter, 410-412.  
Diamond cut grading based on red reflection instruments: T. Linton, G. Holloway, 413-419.

#### **Volume 21, Number 11, July-September 2003**

Notes on the identification of Gilson synthetic opal: G.A. Tombs, 437.  
35 years on - A new look at synthetic opal: A. Smallwood, 438-447.  
The history and importance of heat treatment of Australian sapphire: T. Coldham, 450-462.  
Corundum conundrum: B. Sweeney, 463.  
Synthetic-like fluorescence in a natural sapphire: G.A. Tombs, 464.

#### **Volume 21, Number 12, October-December 2003**

History of education in the GAA: B. Sechos, 470-473.  
The development of valuation technology in Australia: P. Gerrard, 474-477.  
Spectra of gem materials: G. Pearson, 478-485.  
Geoffrey Tombs – A pointer to inspiration: T. Linton, 486-489.  
Lambina opal field – An update: J. Townsend, 490-494.  
Diamond grading for the myopic: R. Bauer, 495-497.  
An interesting Australian abalone pearl: S.M.B. Kelly, G. Brown, 498-501.

#### **Volume 22 January-March 2004 – October-December 2006**

#### **Volume 22, Number 1, January-March 2004**

Topaz from Killiecrankie, Flinders Island, and other Bass Strait Islands: R.S. Bottrill, R.N. Woolley, A.B. Forsyth, 2-9.  
Culturing abalone half-pearls – The story of the New Zealand Eyris Blue Pearl™: P. Hutchins, 10-20.  
Agates and geodes from the Khur area, central Iran: M. Nazari, 21-28.  
Amino acids in the nacre layers of shell from *Magnavacula Penguin* and blister pearls from Sanya, China: Huang Fengming, Chen Zhonghui, Zhou Ying, Yang Mingxing, 29-31.  
Pink gem-quality orthoclase from the Mogok stone tract, Myanmar: U Hla Kyi, U Kway Thu, 32-34.  
Sapphire-blue kyanite from Nepal: U. Henn, 35-36.

#### **Volume 22, Number 2, April-June 2004**

The origin of precious opal – A new model: B. Deveson, 50-58.  
Crocoite: S.P. Sorrell, 59-63.

Spinel from Kayah State, Myanmar: U Tin Hlaing, 64-66.

Inclusions in Vietnamese Quy Chau ruby and their origin: Pham Van Long, Hoang Quang Vinh, Nguyen Xuan Nghia, 67-71.  
Quality enhancement of Vietnamese ruby by heat treatments: P. Winotai, P. Limsuwan, I.M. Tang, S. Limsuwan, 72-77.

#### **Volume 22, Number 3, July-September 2004**

History of DIP DT Course: G. Brown, 91, 97.  
Diamonds in Russia: F. Payette, 99-111.  
The Modern De Beers and the significant changes to the diamond pipeline over the past decade: J. Morris, 112-124.  
Diamond simulants: P. Cartwright, 125-131.

#### **Volume 22, Number 4, October-December 2004**

LIBS: A spark of inspiration in gemmological analytical instrumentation: T. Themelis, 138-145.  
Chemical composition and mineralogical properties of a pink tourmaline mineral from pegmatites around Rajgarh, Ajmer District, Rajasthan, India: Liaqat A K Rao, S. Rehan Ali, Preeti Singh, 146-149.  
In The pink: Argyle's diamond gift to Australia: A. Bevan, P. Downes, 150-155.  
The Kasumigaura Pearl™: B. Dilenburger, 156-161.  
Gemstones in Vietnam – A review: Pham Van Long, G. Giuliani, V. Garnier, D. Ohnenstetter, 162-168.  
A new deposit of gem quality colour-change diaspore from Mông Hsu, Myanmar: U Hla Kyi, Kyaw Khaing Win, 169-170.  
Sapphire in basalt fake: T. Coldham, 171.

#### **Volume 22, Number 5, January-March 2005**

Kalimantan diamond: morphology, surface features and some spectroscopic features: Tay Thye Sun, P. Wathanakul, W. Atichat, Lim Heng Moh, Lee Kien Kem, R. Hermanto, 186-195.  
Pearl resources of China: Zhang Hui, Zhang Beili, 196-209.  
Professional Gem Light 3: R. Beattie, T. Linton, 210-214.  
Rubellite and other gemstones from Momeik Township, northern Shan State, Myanmar: U Tin Hlaing, Aung Khaing Win, 215-218.

#### **Volume 22, Number 6, April-June 2005**

Use and misuse of optical mineralogy constants in gemmology: D.B. Sturman, 234-243.  
The diamond pipeline: H.H. Lim, 244-252.  
Opals from Java: H. Sujatmiko, H.C. Einfalt, U. Henn, 254-259.  
Krüss refractometer - ER 6010: T. Linton, R. Beattie, K. Hughes, 260-262.  
A miscellany of organics: G. Brown, 264-268.

Trapiche of Myanmar: K.K. Win, 269-270.

#### **Volume 22, Number 7, July-September 2005**

Gem corals: Classification and spectroscopic features: V. Rolandi, A. Brajkovic, I. Adamo, R. Bocchio, M. Landonio, 285-297.

The pegmatitic gem deposits of Molo (Momeik) and Sakhan-Gyi (Mogok): U Hla Kyi, Ted Themelis, U Kyaw Thu, 303-309.

The identification of impregnated nephrite: L. Jianjun, 310-317.

#### **Volume 22, Number 8, October-December 2005**

Practical application for measuring gemstone dispersion on the refractometer – Using the C-F solar spectral interval: T. Linton, 330-344.

Gemstone resources of China: C.M. (Mimi) Ou Yang, 349-359.

Glass-filled rubies – Clarity-enhanced rubies with glass-forming additives: T. Themelis, 360-365.

Use of IR-spectroscopy and diffraction to discriminate between natural, synthetic and treated turquoise, and its imitations: A. Pavese, L. Prosperi, M. Dapiaggi, 366-371.

#### **Volume 22, Number 9, January-March 2006**

Amber-like fossil resin from North Queensland, Australia: D.M. Colchester, G. Webb, P. Emseis, 378-385.

Diamonds from the Udachnaya pipe, Yakutia: V. Rolandi, A. Brajkovic, I. Adamo, M. Landonio, 387-397.

Krüss PO11 proportion ocular and stone holder: T. Linton, R. Beattie, K. Hughes, 398-401.

A new deposit of jerejemevite from the Mogok Stone Tract: U Hla Kyi, U Kyaw Thu, 402-405.

From the laboratory: Tay Thye Sun, 406-407.

The adverse impact of scatter on the tone of Shandong sapphire: L. Jianjun, 408-411.

#### **Volume 22, Number 10, April-June 2006**

Welcome to the Patricia Calloway memorial issue, G. Brown, H. Bracewell, B. Sneyd, 426.

Characteristic spectral features of iron as a gemstone chromophore: G. Pearson, 430-446.

Diamond cut grading: Unintended consequences and solutions: S. Sivovolenko, G. Holloway, Y. Shelementiev, J. Mistry, 447-454.

Problems that may be encountered when identifying gemstones in antique jewellery: R. Bauer, 455-459.

Vulcanite or Gutta-Percha: That is the question: G. Brown, 460-465.

My other collection: B. Sneyd, 466-469.

Re-surfacing a refractometer prism: T. Linton, 470.

#### **Volume 22, Number 11, July-September 2006**

Old opal fields revisited at Coober Pedy: I.J. Townsend, 475-478.

Torrington and its gemstones: H. Bracewell, 479-484.

The variation of gemmological properties and chemical composition of gem-quality taaffeites and musgravites from Sri Lanka: K. Schmetzer, L. Kiefert, H.-J. Bernhardt, M. Burford, 485-492.

Test case for the refractometer – Olivine or sinhalite?: A. Hodgkinson, 493-495.

Gemstone mining and exploration in Australia: F. Sutherland, 496-502.

Elephant pearls - True or false?: B. Mann, G. Brown, 503-507.

Mineral and melt inclusions in sapphires as an indicator of conditions of their formation and origin: V. Pakhomova, B. Zalizchak, V. Tishkina, M. Lapina, N. Karmanov, 508-511.

#### **Volume 22, Number 12, October-December 2006**

Gem corals – X-ray diffraction, solid state NMR, elemental analysis: R. Bocchio, S. Bracco, A. Brajkovic, A. Comotti, V. Rolandi, 524-532.

Measurement of refractive indices with the Gemmeter™: L. Cosnier, 533-538.

Identifying Japanese freshwater cultured pearls from Lake Kasumigaura: D.E. Jacob, U. Wehrmeister, T. Häger, W. Hofmeister, 539-541.

Branded diamonds – Their Advantages and Limitations: A. Lynch, 542-555.

Another imitation elephant pearl: G. Brown, 556-557.

#### **Volume 23 January-March 2007 – October-December 2009**

##### **Volume 23, Number 1, January - March 2007**

Blue and pink opals from Acari, Peru: A. Brajkovic, V. Rolandi, P. Vignola, R. Grizzetti, 3-15.

From the laboratory: Tay Thye Sun, 16-21.

Letter to the Editor & Reply (About diamond cut grading), 22-28.

Krüss HA10 Hearts and Arrows loupe: T. Linton, K. Hughes, R. Beattie, 29-31.

##### **Volume 23, Number 2, April - June 2007**

Spodumenes from Nuristan, Afghanistan: L. Natkaniec-Nowak, 51-57.

Sealant impregnated rubies: G.M. Pearson, 58-61.

AGIL refractometer and LED light source: T. Linton, R. Beattie, 62-63.

Usefulness and limitations of using routine FTIR spectra for identifying gemstones compared with the use of classical FTIR spectra using

KBr pellets: Li Jianjun, Luo Yueping, Chen Zhenyu, Meng Lijuan, 64-70.

Be aware of and beware of opal's density: A. Hodgkinson, 71.

Notes from the GSL laboratory: B. Sechos, 72-73.

Moldavite: Natural or imitation?: Tay Thye Sun, 76-78.

Circled pigs' tusks: B. Mann, G. Brown, M. Mahoney, 79-83.

AGIL portable lab set: T. Linton, R. Beattie, 84-85.

### **Volume 23, Number 3, July - September 2007**

Ruby suites from New South Wales: G. Webb, 99-116.

Fact or fiction – Lessons from the history of gems: D. Hoover, 117-119, 122-125.

The SEM and CCL-SEM study of graphitic inclusions in natural brown diamonds: A.S. Bidny, O.V. Kononov, A.G. Veresov, P.V. Ivannikov, 126-130.

Lune River petrified ferns: R.E. Jones, 131-135.

### **Volume 23, Number 4, October - December 2007**

Magnetic susceptibility for gemstone discrimination: D.B. Hoover, B. Williams, 146-159.

Natural gamma radioactivity and exploration for precious opal in Australia: B.R. Senior, L.T. Chadderton, 160-176.

LED light sources and gemmological instruments that analyse colour: T. Linton, 177-179.

### **Volume 23, Number 5, January - March 2008**

Argyle Type 1A pink diamonds: V. Rolandi, A. Brajkovic, I. Adamo, I. Fontana, 194-203.

Spectrophotometric technique for characterising gemstone colours: G. Pearson, 204-217.

Diamond - Varying hardness directions: R. Cartier, 218.

Physical fundamentals behind modern techniques of natural diamond enhancement: V.G. Vins, A.P. Yelissev, 219-221.

Topaz – prismatic growth lines with associated liquid inclusions: T. Linton, 222-225.

From a Singaporean gem laboratory: Tay Thye Sun, 226-231.

Hanneman-Hodgkinson green stained jadeite filter: A. Hodgkinson, 232-236.

AGIL Illumination loupe: T. Linton, 237.

### **Volume 23, Number 6, April - June 2008**

Black opaque gem minerals associated with corundum in the alluvial deposits of Thailand: S. Saminpanaya, F.L. Sutherland, 242-253.

A spectrophotometric study of the thermal colour change of tanzanite: G. Pearson, 254-265.

Opal-C, opal-CT & opal-T from Acari, Peru: F. Caucia, C. Ghisoli, I. Adamo, M. Boiocchi, 266-271.

Steller's sea cow bone: B. Mann, G. Brown, 272-277.

Rumours and contradictions about the Spoonmaker's diamond: M. Hatipoglu, I. Meyanci, C. Turkdofan, D. Comert, O. Temal, 278-283.

Lab reports: R. Bauer, C. Payne, 284-285.

Diamond - Varying hardness directions - Erratum, 286.

### **Volume 23, Number 7, July - September 2008**

Cultured freshwater pearls from the Yangtze River, China: M. Dumanska-Slowik, W. Heflik, L. Natkaniec-Nowak, M. Sikorska, A. Weselucha-Birczynska, 290-299.

Historical extracts from 'The Gazetteer' of the Upper Burma and Shan States: U Tin Hlaing, 300-306.

Images from the outback 'super' conference, 307-310.

A photo essay on Tanzanian star sunstone: G. Pearson, 311-313.

Note from the laboratory – Anglesite, an unusual collector's gemstone: G. Choudhary, 314-315.

Note from the laboratory – Yttria-stabilized zirconia hemisphere apparently imitating a 'Mabe' pearl: T. Lu, Y. Mizukami, K. Yasunaga, T. Odaki, H. Uesugi, 316-317.

### **Volume 23, Number 8, October - December 2008**

Odontolite: B. Mann, B. Jackson, G. Brown†, 330-336.

A colourless natural diamond showing strong orange and mixed coloured fluorescence images: T. Lu, T. Odaki, K. Yasunaga, H. Uesugi, 337-340.

The Upper Burma ruby regulation of 1887: U Tin Hlaing, 341-348.

Hackmanite, tugtupite and afghanite - Tenebrescence and fluorescence of some sodalite related minerals: J. Tunzi, G. Pearson, 349-355.

Account of the 1968 inspection and authentication of the Kasikci or Spoonmaker's diamond: M. Hatipoglu, 356-358.

Economy stereo zoom microscopes: T. Linton, A. Paul, R. Beattie, 360-363.

### **Volume 23, Number 9, January – March 2009**

The Grahame Brown Memorial Issue  
List of published works, 376-384.

Some personal reminiscences, 388-396.

The many facets of Grahame Brown, 397-400.

Sapphire-ruby characteristics, West Pailin, Cambodia: F.L. Sutherland, G. Giuliani, A.E. Fallick, M. Garland, G. Webb, 401-407.

Blue fluorescence in diamonds: G. Holloway, 408-414.

Opal similarities between Andamooka and Coober Pedy, South Australia: I.J. Townsend, 415-420.

Nature and origin of the orbicular granodiorite from Boogardie Station, Western Australia: J. Bevan, A.W.R. Bevan, 421-425.

Precision of instrument readability – Your SG value may not be as good as you think it is: G. Pearson, 426-431.

#### **Volume 23, Number 10, April – June 2009**

The radiopacity of some common gem materials (reprint of November 1975 paper): G. Brown, A.J. Moule, R.L. O'Neil, 434-439.

Large Brazilian diamonds: D.B. Hoover, J. Karfunkel, 440-446.

Optical phenomena in gemstones: R. Cartier, 447-449.

Quahog pearls – Among nature's rarest beauties: A. Matlins, 450-452.

A study of zircon from Tanzania – Malaya zircon: U. Henn, 453-456.

Meteorites: Origins, properties and gemmological significance: G. Pearson, 457-472.

Letter to the Editor - Update on Chinese freshwater cultured pearls and their Raman spectra: S. Karampelas, 473-474.

#### **Volume 23, Number 11, July - September 2009**

Working the blue seam – The tanzanite mines of Merelani: V. Pardieu, R.W. Hughes, G. Soubiraa, M. Rogers, W&M Chitty, P. Brunot, 482-494.

Aquamarine – Natural or synthetic?: A. Hodgkinson, 495-499.

The genetic approach for identification of varieties of crystalline and amorphous silica: V.S Balitsky, O.V. Balitskaya, 500-508.

Micro-magma chambers in natural rubies and sapphires: J.I. Koivula, 509-512.

Precious opal from Java: Tay Thye Sun, Puah Chun Mok, Sunny Liew Paul, M. Paramita, C.E.S. Arps, W. atichat, E. Fritsch, We Weng Kang, K. Wijaya, 513-528.

Presidium GCG and C-Master gem calculators: T. Linton, C. Curtis, 529-532.

#### **Volume 23, Number 12, October – December 2009**

Argyle Type 1A brown diamonds gemmological properties, FTIR, UV-Vis, CL and ESR features: A. Brajkovic, V. Rolandi, R. Scotti, 539-550.

Differentiation of naturally coloured and artificially irradiated blue topaz specimens by their cathodoluminescence properties: Y. Song, X. Yuan, 551-558.

Zultanite, or colour-change diaspore from the Milas (Mugla) region, Turkey: M. Hatipoglu, M. Akgun, 559-563.

Diaspore, zultanite colour-change variety, gemmological properties - Editor's addendum: G. Pearson, 564-566.

Ancient deposit of blue chalcedony in Turkey: M. Hatipoglu, S.C. Chamberlain, 567-574.

Laser inscriptions on diamonds: R. Bauer, 575-578.

Prevention of cracking in Ethiopian opal: S.V. Filin, A.I. Puzynin, 579-582.

Scarselli exhibit of naturally coloured diamonds at the American Museum of Natural History: J. Sheby, 583.

Letter to the Editor – Your SG value might be better than you think: J. Chapman, 584-585.

#### **A4 FORMAT**

#### **Volume 24 January-March 2010 – October-December 2012**

##### **Volume 24, Number 1, January – March 2010**

The Argyle Diamond Mine in transition from open pit to underground extraction: G. Bosshart, J. Chapman, 4-8.

Rubies and sapphires from Winza, Tanzania – summary of characteristic properties and short update of the mining situation: K. Schmetzer, W. Radl, D. Schwarz, 9-14.

Differing causes of colour in diamonds: C. Payne, R. Bauer, 15-16.

The 31st International Gemmological Conference: T. Coldham, F. Payette, 17-22.

Tanzanite - naturally heat treated?: T. Coldham, 23.

Laser inscribed Australian sapphire: R. Bauer, C. Payne, 25.

Examination results 2009: 26-27.

##### **Volume 24, Number 2, April – June 2010**

Federal President's Report, 31.

Microstructures observed in Andamooka matrix opal: G. Pearson, 32-37.

A study of prismatic from Begogo, Madagascar: V. Bordonni, M. Boiocchi, F. Caucia, 38-40.

Coated and fracture-filled coloured diamond: S. Zhonghua, L. Taijin, S. Meidong, S. Jun, D. Jing, Z. Xihuan, 41-43.

A chatoyant malachite: G. Choudhary, 44-45.

Cultj Diamond Selector III™: T. Linton, A. Paul, 46-47.

60th Anniversary GAA WA Division – 1950-2010: 48.

64th Annual Federal Conference: 49.

##### **Volume 24, Number 3, July – September 2010**

Mookaite – A Western Australian ornamental rock: S. and V. Stocklmayer, 56-60.

Spinel from Ywathit deposit, Kayah State, Myanmar: U.T. Hlaing, W. Atichat, C. Sutthirat, 61-63.  
Large synthetic black moissanite on the Australian market: B. Sechos, 64-65.  
Presidium Multi Tester™: T. Linton, I. Johnstone, K. Hunter, 66-67.  
Chrysoberyl: a gemstone with many faces: H.A. Hänni, 68-70.  
The world's top summer show: 71-72.

#### **Volume 24, Number 4, October – December 2010**

Rio Tinto's Argyle Pink Diamonds Tender Update: E. and C. Sanders, 80-84.  
Explaining the flame structure of non-nacreous pearls: H.A. Hänni, 85-88.  
A greenish yellow zoisite: G. Choudhary, 90-91.  
DiamondNite Tester (DN-1) - Instrument Evaluation Committee Report: T. Linton, A. Paul, I. Johnstone, K. Hunter, 92-93.  
Less frequently encountered gemstones – Euclase: R. Brightman, 94-95.

#### **Volume 24, Number 5, January – March 2011**

Triphylite from Brazil – a rare colour-change gemstone: K. Schmetzer, E. Erel, 104-105.  
Comparative study of different types of filled rubies: L. Jianjun, H. Wangjiao, S. Yuan, L. Han, C. Youfa, L. Huafeng, L. Ying, F. Chengxing, Y. Hong, 106-115.  
Less frequently encountered gemstones – Rhodonite: R. Brightman, 116-117.  
A dark-field scope Instrument Evaluation Committee Report: T. Linton, A. Paul, 118-119.  
Gem-Ed – GAA's newly created educational arm: 120.  
An introduction to the PEO of Gem-Ed Australia: 121.  
Gem-A – GAA agreement: 122.  
The Fred Storch Memorial Scholarship: 123.  
Examinations results 2010: 124-125.

#### **Volume 24, Number 6, April – June 2011**

GAA Supporter Pins, 131-132.  
Alexandrites from the Novello alexandrite-emerald deposit Masvingo District, Zimbabwe: K. Schmetzer, S. Stocklmayer, V. Stocklmayer, A-K. Malsy, 133-147.  
The 'hill of the precious stones', Rattanak Kiri, Cambodia: F. Payette, G. Pearson, 148-153.  
Hand held polariscope: T. Linton, A. Paul, 154-155.  
65th Annual Federal Conference: 156-157.  
ICA Congress Brazil 2011: 158.

#### **Volume 24, Number 7, July – September 2011**

Serpentine crystal with purple-red transmission: G. Choudhary, 164-166.

High quality synthetic yellow orange diamond emerges in China: S. Zhonghua, L. Taijin, S. Meidong, S. Jun, S. Jingjing, 167-170.  
Gem-quality green and blue tourmaline from a Coolgardie pegmatite, Western Australia: F. Payette, L. Klemm, 171-175.  
Less frequently encountered gemstones – Painite: R. Brightman, 176-177.  
Tony Kean Award (to T. Coldham): 178.  
32nd International Gemmological Conference (Switzerland): 179.

#### **Volume 24, Number 8, October – December 2011**

Jack Townsend 1945 – 2011 - With Some personal reminiscences of Jack, 184-188.  
Jack's publications 189-193.  
Gemstone – Photomicrography images: W.F. Ashford, 194-195.  
Jack's Opal: R. Bauer, 196.  
Jack, opal specialist valuer: N. Kollias, 197.  
Diamonds and opal: B.J. Morris, 198.  
Tourmaline from Kangaroo Island, South Australia, in the Australian Museum collection: G. Webb, 199.  
Luminescence of gem opals: a review of intrinsic and extrinsic emission: E. Gaillou, E. Fritsch, F. Massuyeau, 200-201.  
Less frequently encountered gemstones – Kyanite: R. Brightman, 202-204.  
International Symposium on Jade: T.T. Sun, 205.  
GAA's 2011 Tanzanian Gem Safari: T. Coldham, 206-207.

#### **Volume 24, Number 9, January – March 2012**

Causes of colour in fancy white diamonds: C. Payne, R. Bauer, 212-214.  
Diopside from Mozambique: G. Choudhary, 215-219.  
Report on a visit to the Jade Market at Mandalay, Myanmar: T. Coldham, 220-223.  
Less frequently encountered gemstones – afghanite: R. Brightman, 224-225.  
George Bosshart 1943-2012: 226.  
Geoffrey Tombs Research Fund: 227.  
Examination Results 2011: 228-229.

#### **Volume 24, Number 10, April – June 2012**

Past, present and future of Australian gem corundum: A. Abduriyim, F.L. Sutherland, T. Coldham, 234-242.  
Natural alexandrites and chrysoberyls from Madagascar with irregular and regular growth patterns: K. Schmetzer, 243-248.  
66th GAA Annual Federal conference: 249-255.

#### **Volume 24, Number 11, July – September 2012**

Natural pearls and cultured pearls: A basic concept and its variations: H.A. Hänni, 258-266.

Oriented inclusions in alexandrite from the Lake Manyara deposit, Tanzania: K. Schmetzer, H.-J. Bernhardt, 267-271.

Bicoloured quartz with unusual colour combination: F. Payette, 272.

Exploring surface features on Brazilian topaz crystals: A. de Goutière, 273-274.

#### **Volume 24, Number 12, October – December 2012**

The Ellendale Diamond Field: exploration history, discovery, geology and mining: A.L. Ahmat, 280-288.

The Kimberley Diamond Company Ellendale diamond collection at the Western Australian Museum: P.J. Downes, A.W.R. Bevan, G.L. Deacon, 289-293.

Non-decorative jewels – with particular reference to watch jewel bearings and components: J. Warner, 294-301.

Highlights from the Giazotto Mineral Collection: R. Hansen, L. Rennie, 302-303.

#### **Volume 25 January-March 2013 – July-December 2015**

##### **Volume 25, Number 1, January – March 2013**

New developments in cultured pearl production: use of organic and baroque shell nuclei: L.E. Cartier, S. Krzemnicki, 6-13.

Cobalt-doped glass-filled sapphires: an update: T. Leelawatanasuk, W. Atitchat, V. Pisutha-Arnond, P. Wattanakul, P. Ounorn, W. Manorotkul, R. Hughes, 14-20.

A mystery jewel: G. Henry, T. Coldham, 21-25.

Gemmological Intelligence - Notes from GSL: 27.

Book reviews: 28-29.

Examination results 2012: 30-31.

##### **Volume 25, Number 2, April - June 2013**

W.H. Hicks Award 2012- A. Ahmat, 36.

The late Dr Grahame Brown's library finds a new home: 36.

Federal Conference Report and Seminar: 37-40.

Vanadium and chromium bearing chrysoberyl from Mogok, Myanmar – an examination of two historical samples: K. Schmetzer, H. Bernhardt, C. Cavey, 41-45.

Experiences on the South Australian Mintabie opal fields- past and present: P. Blythe, M. Novelli, T. Coldham, 46-54.

Violet and pink coated opals: G. Choudhary, 55-57.

Unusual organic gem materials- chitons: S. Stocklmayer, 58-59.

Follow up on the mystery jewel: G. Henry, 60-61.

Dichromatism, the cause of the Usambara and the alexandrite colour-change effects: G. Pearson, D. Hoover, 62-70.

Gemmological Intelligence: B. Sechos, R. Bauer, 71-72.

Book reviews: 73-74.

Further Examination results 2012: 74.

##### **Volume 25, Number 3, July - September 2013**

Corinne Sutherland memorial issue: 80-81.

How diamond performance attributes: brilliance, scintillation and fire depend on human vision features: S. Sivovolenko, Y. Shelementiev, G. Holloway, J. Mistry, R. Serov, S. Zhulin, K. Zipa, 82- 121.

##### **Volume 25, Number 4, October - December 2013**

Gem-A Conference: 128.

IGC Vietnam report: T. Coldham, 129-131.

A simple approach to separate natural from synthetic ametrine: F. Payette, 132-141.

The characteristics of amber from Indonesia: T. Leelawatanasuk, P. Wathanakul, S. Paramita, C. Suthirat, B. Sriprasert, P. Bupparenoo, 142-145.

An ornamental sapphirine-cordierite-sillimanite rock from South India: G. Choudary, 146-151.

Identification of treated quartzite imitating B-jade and B+C jade: T. Sun, I. Ying, 152-153.

Gemmological Intelligence: B. Sechos, R. Bauer, 154-157.

Examination results 2013: 158-159.

Errata: 159.

##### **Volume 25, Number 5, January- March 2014**

68<sup>th</sup> Federal Conference: 165.

The development of a new course titled: Advanced gemstone inclusions course: J. Mackenzie, 166-174.

Quartz with sagenitic rutile inclusions from Myanmar: K. Schmetzer, M. P. Steinbach, 175-179.

Tom Nunan- sapphire miner extraordinaire 1928-2013: T. Coldham, 180-191.

Gemmological Intelligence: G. Pearson, 192-193.

Book reviews: 194-195.

**Volume 25, Numbers 6-7, April – September, 2014**

68<sup>th</sup> Federal Conference report: 201-205.

Obituary - Chris Andrews: 205.

The unique attributes of Australian precious opal: A. Smallwood, 207-230.

Yellow gem plagioclase from Cenozoic basalts, eastern Australia, identity and origin: F.L. Sutherland, A. Abduriyim, R. Pogson, G. Sutherland, R. Wuhler, 231-238.

A theoretical and experimental study of the heat treatment of opaque Thai sapphire to transparent blue sapphire: T. Sripoonjan, B. Wanthanachaisaeng, C. Sutthirat, 239-244.

Residual pressure distribution and visualization of mineral inclusions in corundum: application of photoluminescence spectroscopy in relation to sapphires from New England, New South Wales, Australia: A. Abduriyim N. Kamegata, N. Noguchi, H. Kagi, F.L. Sutherland, T. Coldham, 245-254.

Gemmological Intelligence: G. Pearson, 255-258.

Book review: 258.

**Volume 25, Number 8, October - December, 2014**

Gem-A Conference report 2014: 264-267.

Chromism in pink diamonds J. Chapman, 268-271.

Australian opalized fossils- Earth treasures from dried mud and deep time: E. Smith, 272-278.

Agate investigation with particular emphasis on iris agate: G. Pearson, R. Green, 279-287.

Gemmological Intelligence: A. Malecka, 288-289.

GAA Instrument Evaluation Committee report: T. Linton, A. Smallwood, A. Paul, 290-291.

Examination results 2014: 292-293.

**Volume 25, Number 9, January- March, 2015**

Divisional News: 301-302

Vale George Norris: B. Nicol, 303

Australian opal centre: a glittering palace for the queen of gems: J. Brammall, 304-315.

A review of diamonds in Zimbabwe-a century on: V. Stocklmayer, S. Stocklmayer, 316-325.

Microstructures of opal related to gemological characteristics: S.Toaree,B.

Wanthanachaisaeng, C. Sutthirat, 326-329.

Examination results 2014: 330-331.

**Volume 25, Number 10, April- June, 2015**

Divisional News: 336.

An unusual color-change almandine from Fazenda Rodolita, Tocantins State, Brazil: D. Hoover, J. Karfunkel, K. Krambrock, A. F. Fernandes, 337-345.

Rare gem mineral deposits from Brazil – Part 3: M. de Sa Carneiro Chaves, J. Karfunkel, L. da Silveira, R. Scholz, K. Krambrock, C. Dias, D. Hoover, 346-353.

The 14<sup>th</sup> Gemmological Symposium in Paris, France, 8th June 2015: L. Sutherland, 354-355.

ICA Congress and Mine Tour Sri Lanka 2015: K. Kovacs, 356-357.

High intensity LED fibre optic: T. Linton, A. Paul, A. Smallwood, 358-360.

Online diamond ring sales fraud: S. C. Edwards, 361-363.

**Volume 25, Numbers 11-12, July-December, 2015**

Vale Bob Sneed: 368.

Report on the Gem-A Conference 2015: L. Cunningham, 370-371.

European precious opal from Cervenica-Dubnik – an historical and gemmological summary: P. Semrad, 372-388.

Padparadscha or pretender: examination of an unusual pink-orange sapphire: E. B. Hughes, C. Chankhantha, A. Burkhardt, W. Manorotkul, R. Hughes, 389-392.

Ethiopian opals: facts, fears and fairytales: J. Bergman, B. Wheat, 393-402.

Moldavite, a gemmological relevant natural glass: G. Pearson, 403-409.

An unusual occurrence of iron sulphide and baryte in Coober Pedy opal: B.A. Grguric, A. Pring, J. Zhao, 410-411.

**Volume 26, Numbers 1-4, January-December, 2016**

Divisional News: 4-8.

Glass filling of corundum- the story of Noi and Tam and their gem treatment business in Thailand: R. Chapman, 9-13.

Chelsea filter- function, applications,  
performance inconsistencies with age: G.  
Pearson, 16-26.

Lab update: CVD synthetic diamond identified in  
the GIT-GTL: S. Promwongnan, T.  
Leelawatanasuk, T. Lhuaamporn, 27-32.

Challenging synthetic rubies examined in GIA's  
Bangkok and Hong Kong laboratories: S.  
Saeseaw, J. Muiyal, S. Sangsawong, 33-44.

Amethyst of remarkable fine qualities from a  
reportedly new find in Rwanda: T. Stephen, F.  
Schmitz, 45-47.

Overview of garnet composition inter-  
relationships: G. Pearson, 4-53.

Gemmological Intelligence: T. Coldham, 54.

Book review: 55.

Guidelines for authors: 55.
